Archaeological Method:

Archaeological Method and Theory Linda Ellis, 2003-12-16 This Encyclopedia brings together the most recent scientific information on a collection of subjects that are too often and inconveniently treated in separate publications. It provides a survey of archaeological method and theory as well as the application of physical and biological sciences in archaeological research. Every aspect of archaeological work is represented from the discovery process to the ultimate disposition of materials. Thus the reader will find entries on subject matter covering disciplinary theory, legislation affecting the work of archaeologists, pre-excitation surveying, excavation methodology, on-site conservation techniques, post-excitation analysis. The rapid evolution of analytical technology is often superficially treated or not covered at all in textbooks or other commonly available sources. Here the latest refinements in techniques such as radiometric dating, stable isotopic analysis, and the PCR technique of DNA analysis are presented clearly and authoritatively. The discussion of these techniques is amplified by including results of the work of professionals conducting interdisciplinary research and by covering the methodological enhancements provided by the physical and natural sciences. Cultural property legislation, regardless of its country of origin, has affected how archaeologists conduct their work. This encyclopedia covers all major U.S. legislation developed for the protection of cultural property, including the recent Native American Graves Protection and Repatriation Act, and offers a substantial article on worldwide legislation concerning the reburial of human remains and its effects on the present and future practice of archaeology. Without some sort of conservation program at the point of excavation, valuable materials may be inadvertently contaminated or destroyed. Many simple and low-cost techniques to promote both sample integrity and long-term preservation for major classes of materials are described in this volume. Traditional treatments of method and theory usually focus on prehistoric periods and are limited in their geographic range. This volume includes discussions based on various historical periods on different continents as reflected in entries such as Historical Archaeology, Industrial Archaeology, Medieval Archaeology, and Classical Archaeology.

Archaeological Method Evzen Neustupny, 1993-08-26 The archaeological record consists of dead finds, remnants of human culture. The archaeologist relies on them to understand how past societies were organized and how they functioned. This book by the distinguished Czech scholar Evzen Neustupny considers the archaeological method, the way in which archaeologists translate mute objects into descriptions of a living past. The method involves a series of steps: an analysis of the archaeological record, a synthesis of the finds to generate formal archaeological structure, and the use of models derived from descriptions of observed human activity to explain these structures. Without models, archaeologists would have no way of interpreting their finds. The author also considers the relevance of archaeology of such concepts as induction and deduction, empirical research, and theory.

Archaeological Method, **Handbook of Archaeological Methods** Herbert D. G. Maschner, Christopher Chippindale, 2005 The Handbook of Archaeological Methods comprises 37 articles by leading archaeologists on the key methods used by archaeologists in the

field in analysis in theory building and in managing cultural resources The book is destined to become the key reference work for archaeologists and their advanced students on contemporary archaeological methods Advances in Archaeological Method and Theory Michael B Schiffer,2014-06-30 Advances in Archaeological Method and Theory Volume 11 is a collection of papers that discusses world systems theory modeling interregional interaction in prehistory and the archaeological analysis of ceramics Some papers review dating and weathering of inorganic materials strategies for paleo environmental reconstruction as well as deposits and depositional events One paper reviews the Old World state formation that occurred in West Asia during the fourth and third millennia B C Another paper examines the role of interactions among societies in the process of local social change and the need for archaeologists to develop a framework in which to analyze intersocietal interaction processes The presence of items such as ceramics is associated directly to factors of availability functions economic values or ethnic affiliation As an example one paper cites the use and misuse of English and American ceramics in archaeological analysis in identifying cultural patterns and human behavior Another paper notes that each biological or mechanical agent of transport and deposition has its own respective attributes on a deposit where the attributes of sedimentary particles on the deposit can be defined From such definitions the archaeologists can make observations and inferences Sociologists anthropologist ethnographers museum curators professional or amateur archaeologists and academicians studying historical antiquities will find the collection very useful Archaeological Method and Theory Michael B. Schiffer,1989-05-01 *Advances in Archaeological Method and Theory* Michael B Schiffer,2014-06-30 Advances in Archaeological Method and Theory Volume 5 presents the progressive explorations in methods and theory in archeology This book provides information pertinent to the developments in urban archeology Organized into nine chapters this volume begins with an overview of cultural resource management developed to assess the significance of and to manage the cultural resources on public lands This text then explores the basic aspects of natural and human caused changes on the portion of the archaeological resource base consisting of archaeological sites Other chapters consider the practice of urban archeology in the United States with emphasis on the relationships between human behavior and material culture in an urban setting This book discusses as well the applications of computer graphics in archeology The final chapter deals with the types of skeletal and population changes that accompany malnutrition This book is a valuable resource for anthropologist archaeologists urban planners and graduate students Advances in Archaeological Method and Theory Michael B Schiffer,2014-06-30 Advances in Archaeological Method and Theory Volume 1 presents the progressive explorations in methods and theory in archeology This book discusses the strategy for appraising significance which is needed to maximize the preservation and wise use of cultural resources Organized into 10 chapters this volume begins with an overview of planning for the best long term use of cultural resources which is the essence of conservation archeology This text then examines importance of the concept in cultural ecological studies Other chapters consider the methods used in determining

the density size and growth rate of human populations This book discusses as well the use of demographic variables in archeological explanation The final chapter deals with the decisions that must be made in designing a survey and to identify the alternative consequences for data recovery of various strategies This book is a valuable resource for archeologists and planners

Advances in Archaeological Method and Theory, 2014-06-28 *Advances in Archaeological Method and Theory* [Advances in Archaeological Method and Theory](#) Michael B Schiffer, 2014-06-30 *Advances in Archaeological Method and Theory* Volume 3 presents the progressive explorations in methods and theory in archeology This book discusses the general cultural significance of cult archeology Organized into nine chapters this volume begins with an overview of the spectrum of professional reactions to cult archeology This text then examines the applicability of evolutionary theory to archeology Other chapters consider the fundamental principles of adaptation as applied to human behavior and review the state of application of adaptational approaches in archeology This book discusses as well the convergence of evolutionary and ecological perspectives in anthropology that has given rise to a distinct concept of culture The final chapter deals with obsidian dating as a chronometric method and explains the problems that limit its effectiveness This book is a valuable resource for archeologists and anthropologists Graduate students and archeology students will also find this book extremely useful

Advances in Archaeological Method and Theory Michael B Schiffer, 2014-06-30 *Advances in Archaeological Method and Theory* Volume 8 is a collection of papers that discusses postprocessual archaeology bone technology and tree ring dating in Eastern North America One paper discriminates between the process and norm and eliminates the dichotomy by locating human agency and the active It focuses on monitoring individuals as being in the center of social theory Another paper discusses the physical model and the textual model that describe the basic components of an archaeological record For example the first model implies that archaeological inferences move from material components of the record to material phenomena in the past The second model assumes that archaeological inference should move from material phenomena to mental phenomena from material symbols to the ideas and beliefs they encode Another paper explains the use of analogy as a useful tool in archaeological considerations One paper investigates bones as a material for study including the analysis of carnivore induced fractures or hominid induced modifications from using bones as tools The collection is suitable for sociologists anthropologist professional or amateur archaeologists and museum curators studying archaeological artifacts

The Archaeology of Science Michael Brian Schiffer, 2013-04-19 This manual pulls together and illustrates with interesting case studies the variety of specialized and generalized archaeological research strategies that yield new insights into science Throughout the book there are templates consisting of questions to help readers visualize and design their own projects The manual seeks to be as general as possible applicable to any society and so science is defined as the creation of useful knowledge the kinds of knowledge that enable people to make predictions The chapters in Part I discuss the scope of the archaeology of science and furnish a conceptual foundation for the remainder of the book Next Part II presents several

specialized but widely practiced research strategies that contribute to the archaeology of science In order to thoroughly ground the manual in real life applications Part III presents lengthy case studies that feature the use of historical and archaeological evidence in the study of scientific activities

Interrogating Networks Lin Foxhall,2021-06-09 Network theory and methodologies have become central to exploring and explaining social economic and political relationships and connections in past societies However in archaeology the deployment of networks has sometimes been more descriptive than analytical Methodologies have often depended upon underlying assumptions which inevitably simplify relationships that were complex and multi faceted However the fragmentary heterogenous and usually proxy data we possess are not always amenable to reconstructing that complexity In ancient societies we must infer the movement of knowledge about how to make things largely from objects themselves This is because we usually lack direct evidence of the human relationships that entwined people with objects and their makers and hence have only imperfect understanding of the full range of diverse factors that shaped the relationships that constituted these networks The chapters in this volume aim to interrogate the interpretative potential of network concepts for understanding the movement over time and space of ideas about making using and moving things through a range of archaeological case studies which reveal both functional and dysfunctional relationships The purpose is to consider how more broadly contextualized and multi faceted studies can both enhance and be enhanced by network and related approaches The volume contributes to the search for greater understanding of the movement and transmission of knowledge or in some cases their absence and to debates about how best to expand the utility of network concepts and approaches

Advances in Archaeological Method and Theory Michael B Schiffer,2014-06-30 Advances in Archaeological Method and Theory Volume 4 presents the progressive explorations in methods and theory in archeology This book discusses the increasing application of surface collection in cultural resource management Organized into eight chapters this volume begins with an overview of the fundamental aspects of archeoastronomy and explains what kinds of testable hypotheses that archeoastronomy generates This text then examines the general implications for the study of cultural complexity Other chapters consider the use of surface artifacts by archeologists to locate sites establish regional culture histories and to know where to excavate within sites This book discusses as well the interpretative interfaces between archeology on the one hand and ethnohistory and ethnology on the other that is based on a theoretical stance advocating a fundamental holistic approach to anthropology The final chapter deals with understanding the ecology of ancient organisms This book is a valuable resource for archeologists and anthropologists

Essential Tensions in Archaeological Method and Theory Todd L. VanPool,Christine S. VanPool,2003 Archaeological theory some say seems to have fragmented into a thousand fundamentalisms By working on a broader set of empirical issues than ever before archaeologists are indeed applying and refining a variety of perspectives Yet the editors of this volume make a case that it is appropriate for archaeologists to use a logical variety of theoretical structures to answer different kinds of questions combining approaches

as necessary In that spirit of plurality contributors to this volume identify an important theoretical or methodological problem and present an argument regarding its solution They also provide a critical evaluation of the current state of archaeological method and theory illustrating that such recurrent issues as the role of agency and the importance of social considerations in the formation of archaeological research dominate current theoretical development By presenting both the range of important questions and a variety of answers this volume contributes to the essential tension that will further the growth of archaeological theory

Dug to Death Adrian Praetzelis,2003-08-04 Dr Hannah Green heroine of Praetzelis s textbook as novel *Death by Theory* has really gotten herself into trouble this time The spunky archaeologist has been asked to manage the contract archaeology project at a historic site in New Zealand when the regular archaeological staff of University of Invercargill abruptly dies off On the scene Hannah discovers she needs to teach her team about research design survey methods archival research professional ethics curation and especially field safety if they are to complete the contract before young Mr Wallace levels the site in favor of a golf course With a cast of characters that includes Missy Jojo the Dog Faced Girl as lab supervisor erotic romance writer and field volunteer Elena Solara the ghost of socialite Bunny Wallace and shovelbum Rusty Spittle Praetzelis brief textbook as novel introduces students to the hows and whys of field methodology in an entertaining but informative way Ideal for your introductory archaeology classes and probably the only textbook you ll enjoy reading yourself
