A Way Out:

Black Women Theorizing Curriculum Studies in Colour and Curves Kirsten T. Edwards Williams, Denise Taliaferro Baszile, Nichole A. Guillory, 2020-06-04 This book explores the curriculum theorizing of Black women as well as their historical and contemporary contributions to the always evolving complicated conversation that is Curriculum Studies It serves as an opportunity to begin a dialogue of revision and reconciliation and offers a vision for the transformation of academia's relationship with black women as students teachers and theorizers Taking the perennial silencing of Black women's voices in academia as its impetus the book explains how even fields like Curriculum Studies where scholars have worked to challenge hegemony injustice and silence within the larger discipline of education have struggled to identify an intellectual tradition marked by the Black female subjectivity This epistemic amnesia is an ongoing reminder of the strength of what bell hooks calls imperialist white supremacist capitalist patriarchy and the ways in which even the most critical spaces fail to recognize the contributions and even the very existence of Black women Seeking to redress this balance this book engages the curricular lives of Black women and girls epistemologically bodily experientially and publicly Providing a clarion call for fellow educators to remain reflexive and committed to emancipatory aims this book will be of interest to researchers seeking an exploration of critical voices from nondominant identities perspectives and concerns This book was originally published as a special issue of Gender and Education

Does Development Aid Affect Conflict Ripeness? Lucie Podszun, 2011-08-27 Many developing countries find themselves in seemingly intractable internal conflicts hindering them from moving on into a more stable secure and wealthy environment It seems that underdevelopment and conflict go hand in hand Underdevelopment most often implies large streams of development aid channeled into countries at war The work evaluates to what extent an increase in development aid affects conflict ripeness The research shows that the effect is ambivalent it depends on the conditions of provision whether it is positive or negative In general an increase in development aid decreases the intensity of one of the ingredients to conflict ripeness the mutually hurting stalemate However if embedded into a smart strategy an increase in development aid enhances the second ingredient to conflict ripeness the sense of a way out By that it counterbalances the negative effect and thus fosters the phase of ripeness creating an ideal starting position for a subsequent peace process
