Christian Religion And Biotechnology A Search For Principled Decisionmaking

George Patrick Smith

Christian Religion And Biotechnology A Search For Principled Decisionmaking:

The Christian Religion and Biotechnology George P. Smith, 2005-03-21 Religion is a dominant force in the lives of many Americans. It animates, challenges, directs, and shapes as well the legal, political, and scientific agendas of the new Age of Biotechnology. In a very real way, religion, biomedical technology, and law are epistemologically different. Yet they are equal vectors of force in defining reality and approaching an understanding of it. Indeed, all three share a synergetic relationship for they seek to understand and improve the human condition. This book strikes a rich balance between thorough analysis in the body, anchored in sound references to religion, law, and medical/scientific analysis, and a strong scholarly direction in the end notes. It presents new insights into the decision-making processes of the new Age of Biotechnology and shows how religion, law, and medical science interact in shaping, directing, and informing the political processes. This volume will be of interest to both scholars and practitioners in the fields of religion and theology, philosophy, ethics, family law, science, medicine, political science, and public policy, and gender studies. It will serve as a reference source and can be used in graduate and undergraduate courses in law, medicine, and religion.

Law and Bioethics George Patrick Smith (II), 2012 George P. Smith II is a leading figure in the world of medical law and ethics. During his long career, he has addressed some of the most important issues in bioethics and has contributed much original thought to the debates in this field. This book celebrates his contribution by bringing together his key writings in bioethics. The chapters include previously published material; however, the pieces have been substantially updated to include more recent developments and rewritten, drawing out the themes and strands which have run through Professor Smith's thinking over the past fifty years. The book covers topics including human rights and medical law, the allocation of resources and distributive justice, ethical relativism, science and religion, and public health emergencies. In doing so, it offers an excellent overview of the current bioethical issues in medical law in light of recent and ongoing technological developments in medicine. This collection of essays by one of the world's leading medical lawyers is academic research of the highest quality. With an enviable clarity of thought and force of argument, Professor Smith tackles some of the major issues facing medicine and law today. It is a tour de force by an academic at the height of his powers.

Professor Jonathan Herring, University of Oxford

Genetically Engineered Foods Armando Mills, 2019-08-13 Genetically modified foods are foods derived from genetically modified organisms that have had specific changes introduced into their DNA by genetic engineering techniques. The main aim of genetically modified crops is to produce a food that is able to survive even if any harmful chemicals or pesticides or herbicides are sprayed. Genetically engineered foods have had their DNA changed using genes from other plants or animals. Scientists take the gene for a desired trait in one plant or animal and they insert that gene into a cell of another plant or animal. Genetic engineering can be done with plants, animals, or bacteria and other very small organisms. Genetic engineering allows scientists to move desired genes from one plant or animal into another. Genes can also be moved from an animal to a plant or vice versa. Genetic engineering also helps speed up the

process of creating new foods with desired traits Genetically modified material sounds a little bit like science fiction territory but in reality much of what we eat on a daily basis is a genetically modified organism Whether or not these modified foods are actually healthy is still up for debate and many times you don't even know that you are buying something genetically modified The book will be of help to researcher in the field of agriculture crop improvement biotechnology etc It will also be helpful to teachers and students for better understanding of the subject

Distributive Justice and the New Medicine

George Patrick Smith, 2010-01-01 Smith has packed an incredible amount of information into this relatively short and clearly written book His erudition is unquestionable and his knowledge of current trends in medical technology and the ethical issues surrounding them is obvious on every page P Jenkins Choice George P Smith is one of the world's leading experts on the legal and ethical issues raised by modern medicine His book is a wide ranging and deeply informed and considered analysis of those issues with particular emphasis on the inequality with which the benefits of modern medicine are bestowed on the sick Knowledgeable as well about the technical aspects of the biomedical revolution Smith writes with insight and authority and offers a perspective that will influence the policy debates Richard A Posner United States Court of Appeals for the Seventh Circuit and University of Chicago Law School US While much has been written about the various issues addressed in this book genetics cloning informed consent organ donation Smith's book moves beyond traditional legal analysis tying these issues together by examining them through the lens of distributive justice He thus provides the reader with a unique and valuable perspective on this important area Distributive Justice and the New Medicine will be of interest to all those interested in health law and bioethics and in particular for those interested in distributive justice Belinda Bennett Journal of Law Social Justice and Global Development Professor George P Smith's Distributive Justice and the New Medicine is a major new work by one of the world's leading medical lawyers This book brings important new insights into the complex area of rationing health care resources and should be read by anyone interested in seeking to create a just society Jonathan Herring Exeter College University of Oxford UK Is the advancement of scientific knowledge and the development of biomedical technologies known as the New Medicine desirable George P Smith asks this fundamental question while also confronting the distribution of these scarce medical resources Law economics medical science philosophy and ethics all coalesce in this discussion of how to structure normative standards of conduct that will improve the quality of human life The author begins by examining various economic constructs as aids for achieving a fair and equitable delivery of health care services He then assesses their level of practical application and evaluates the costs and benefits to society of pursuing the development and use of the New Medicine The book ends with a case study of organ and tissue transplantation that illustrates the implementation of distributive justice The author concludes that as long as clinical medicine maintains its focus on healing and alleviating suffering among patients a point of equilibrium will be reached that advances the common good This timely and compelling exploration will be a must read for scholars researchers policymakers and all those

interested in advances in medical technology and the issues surrounding access to health care **Palliative Care and End-of-Life Decisions** G. Smith, 2013-10-22 Total pain management mandates that an ethic of adjusted care be implemented at the end stage of life which acknowledges ethically legally and clinically the use of terminal sedation as efficacious treatment **Dignity as a Human Right?** George P. Smith, 2018-11-27 Dignity is seen commonly as an ethical obligation owed to human persons The dimensions of this obligation are subject to wide discussion and defy universal agreement Dignity is seen commonly as an ethical obligation owed to human persons Dignity as a Human Right examines dignity within the prism of death and more particularly its humane and dignified management Although there is no domestic or international right to die with dignity within the right to life should arguably be a right to dignity and self determination especially at its end stage for a powerful interface exists between the right to human dignity and the very right to life to love and humanity as well as compassion at its conclusion Legislative efforts nationally and internationally have begun to recognize a right to die with dignity when a condition of medical futility exists There are presently five states and the District of Columbia together with a judicial interpretation from the Montana Supreme Court which recognize death assistance for the terminally ill Internationally Canada Belgium the Netherlands and Switzerland are seen as leaders in this recognition The United Nations has played a significant role in framing end of life decision making within the ambit of human rights protection The UN Charter states unequivocally that the dignity and worth of the human person must be protected and safeguarded Similarly among other instruments the Universal Declaration on Human Rights acknowledges that all human beings are born free and equal in dignity and rights *The Moral, Social, and Commercial Imperatives of Genetic Testing and Screening* Michela Betta, 2006-07-14 In the past people were classified as being healthy or sick With genetic testing and screening adults might be healthy predisposed to an illness probably at risk at risk or carriers of certain risks Genetic testing and screening hits another dramatic note when cells and embryos are tested and subsequently altered to hit targets of perfection This insightful book combines theory and social practice drawing on a range of disciplines and presenting contrasting viewpoints **Ethics, Politics, and Democracy** Jose V. Ciprut, 2008 Examines change in the normative underpinnings of both ancient and modern practices of political governance public duties and personal responsibilities **Of Panjandrums, Pooh Bahs, Parvenus, and Prophets** George Patrick Smith, 2005 **The British National Bibliography** Arthur James Wells, 2005 **The Writers Directory**, 2013 *Diverse Issues in Higher Education*, 2007-06 **Encyclopedia of Bioethics** Stephen Garrard Post, 2003 *Sociological Abstracts* Leo P. Chall, 1997 CSA Sociological Abstracts abstracts and indexes the international literature in sociology and related disciplines in the social and behavioral sciences The database provides abstracts of journal articles and citations to book reviews drawn from over 1 800 serials publications and also provides abstracts of books book chapters dissertations and conference papers The Catholic Periodical and Literature Index, 1975 Choice, 2001 *The Philosopher's Index*, 2008 Vols for 1969 include a section of
