*The New Map of the World* Giuseppe Mazzotta, 2014-07-14 For today's readers the great Italian philosopher of history Giambattista Vico 1668-1744 can be startlingly relevant to the social and educational divisiveness we confront at century's end here Giuseppe Mazzotta one of the leading Italianists in the United States shows how much Vico properly read can bring to an understanding of contemporary social problems To explore Vico's body of thought in all its monumental complexity Mazzotta highlights the place of poetry or writerliness in Vico's educational project which links literature history religion philosophy and politics *The New Map of the World* is the first book since Benedetto Croce's *The Philosophy of G B Vico* 1911 to interpret the immense range of Vico's creativity Beginning with Vico's autobiography Mazzotta explains that Vico's heroic attempt to unite the arts and sciences was meant to offer a desperately needed political unity to modern society In contrast to past thematic studies of Vico that focus on a single one of his ideas *The New Map of the World* explores the vital interaction of the issues that fascinated him his educational and political project his sense of the necessity for a new way of conceiving authority and his belief in the power of poetry Mazzotta ends by examining Vico's awareness of the tragic limits of politics itself Originally published in 1999 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
