Michalos, 2017-06-14 This volume provides bridges from the social sciences to business ethics and from the latter to the quality of life by connecting the research themes of quality of life social sciences including public policy making and business ethics or corporate responsibility. It builds on the premise that public policy making is essentially a species of good decision making as explained in the first volume. It shows that because most developed countries function as market economies whose governments depend on taxation to pay for their services and because a large proportion of government revenue comes from well regulated responsible corporations the quality of people's lives is highly dependent upon good public policies taxation and business ethics. The volume presents and examines ethical moral problems arising in market economies since the first century BCE including the first appearance of the business case for business ethics fourteen arguments concerning the neglect of business ethics business ethics issues for the 1990s and beyond the loyal agent's argument advertising the importance of trust public opinion polling public program evaluation and a critique of the relatively new monster of super capitalism. In addition it deals with connections among the concepts of efficiency morality and rationality related to decision making in general and public policy making in particular. Finally it explains relationships between outcomes measurement and performance indicators in general and performance based management in public administration the taxation of net wealth and financial transactions. **1,001 Bright Ideas to Stretch Your Dollars** Cynthia Yates, 1995 Cynthia Yates interviews grocers merchants financial consultants and others to show you how to make your dollars stretch. **The Ideal Made Real** Christian Daa Larson, 1909 **Access**, 2005 **Report** Iowa State Horticultural Society, 1895 **Transactions** Iowa State Horticultural Society, 1895 **Economics: Concepts, Methodologies, Tools, and Applications** Management Association, Information Resources, 2015-06-30 Organizations governments and corporations are all concerned with distributing their goods and services to those who need them most consequently benefiting in the process.
