Blum,2011-06-15 Classroom Cheats Turn to Computers Student Essays on Internet Offer Challenge to Teachers Faking the Grade Headlines such as these have been blaring the alarming news of an epidemic of plagiarism and cheating in American colleges more than 75 percent of students admit to having cheated 68 percent admit to cutting and pasting material from the Internet without citation Professors are reminded almost daily that many of today s college students operate under an entirely new set of assumptions about originality and ethics Practices that even a decade ago would have been regarded almost universally as academically dishonest are now commonplace Is this development an indication of dramatic shifts in education and the larger culture In a book that dismisses hand wringing in favor of a rich account of how students actually think and act Susan D Blum discovers two cultures that exist often uneasily side by side in the classroom Relying extensively on interviews conducted by students with students My Word presents the voices of today s young adults as they muse about their daily activities their challenges and the meanings of their college lives Outcomes based secondary education the steeply rising cost of college tuition and an economic climate in which higher education is valued for its effect on future earnings above all else These factors each have a role to play in explaining why students might pursue good grades by any means necessary These incentives have arisen in the same era as easily accessible ways to cheat electronically and with almost intolerable pressures

that result in many students being diagnosed as clinically depressed during their transition from childhood to adulthood. However, Blum suggests the real problem of academic dishonesty arises primarily from a lack of communication between two distinct cultures within the university setting. On one hand, professors and administrators regard plagiarism as a serious academic crime, an ethical transgression, even a sin against an ethos of individualism and originality. Students on the other hand revel in sharing in multiplicity in accomplishment at any cost. Although this book is unlikely to reassure readers who hope that increasing rates of plagiarism can be reversed with strongly worded warnings on the first day of class, *My Word* opens a dialogue between professors and their students that may lead to true mutual comprehension and serve as the basis for an alignment between student practices and their professors' expectations.

Arthur James Wells, 2009. *Handbook for Arabic Language Teaching Professionals in the 21st Century*. Kassem M. Wahba, Zeinab A. Taha, Liz England, 2013-04-15. This landmark volume offers an introduction to the field of teaching Arabic as a foreign or second language. Recent growth in student numbers and the demand for new and more diverse Arabic language programs of instruction have created a need that has outpaced the ability of teacher preparation programs to provide sufficient numbers of well-qualified professional teachers at the level of skill required. Arabic language program administrators anticipate that the increases in enrollment will continue into the next decades. More resources and more varied materials are seriously needed in Arabic teacher education and training. The goal of this Handbook is to address that need. The most significant feature of this volume is its pioneer role in approaching the field of Arabic language teaching from many different perspectives. It offers readers the opportunity to consider the role, status, and content of Arabic language teaching in the world today. The Handbook is intended as a resource to be used in building Arabic language and teacher education programs and in guiding future academic research. Thirty-four chapters, authored by leaders in the field, are organized around nine themes: Background of Arabic Language Teaching; Contexts of Arabic Language Teaching; Communicative Competence in Arabic; The Learners; Assessment; Technology Applications; Curriculum Development; Design and Models; Arabic Language Program Administration and Management; and Planning for the Future of Arabic Language Learning and Teaching. The *Handbook for Arabic Language Teaching Professionals in the 21st Century* will benefit and be welcomed by Arabic language teacher educators and trainers, administrators, graduate students, and scholars around the world. It is intended to create dialogue among scholars and professionals in the field and in related fields, dialogue that will contribute to creating new models for curriculum and course design, materials, and assessment tools, and ultimately better instructional effectiveness for all Arabic learners everywhere, in both Arabic-speaking and non-Arabic-speaking countries.
