Bring Back My Stringbag:

Bring Back My Stringbag John Kilbracken,1996 Vigorous light hearted and extraordinarily vivid this account by Lord Kilbracken of his five years in the Fleet Air Arm during the Second World War provides a remarkable picture of personal dealings with Swordfish aircraft affectionately known as Stringbags which he asserts seemed to have been left in the war by mistake At the same time he reveals what a significant often dramatic role they played in the world course of hostilities

Bring Back My Stringbag John Raymond Godley Baron Kilbracken,1980 *Bring Back My Stringbag* John Raymond Godley Kilbracken,1979 *Combat Biplanes of World War II* Peter C. Smith,2015-09-30 Aviation and maritime historian Peter C Smith reveals how both Allied and Axis powers used World War I era aircraft in *Combat Biplanes of World War II* The era of the combat biplane is usually thought to have been between 1914 and 1938 By the outbreak of World War II most of the advanced air forces of the world had moved on to monoplane aircraft for their front line battle forces both in bomber and fighter capacities Yet despite this many biplanes did still survive both in front line service and in numerous subsidiary roles and not just as training machines but as fully operational warplanes Thus in 1939 the majority of major European powers still retained some albeit few biplane aircraft Great Britain had the bulk of such obsolescent machines including the Gladiator Swordfish Walrus Vildebeeste and Audax while the inferior Albacore meant to replace the Swordfish had yet to enter service Germany still managed to conduct missions in which biplanes like the He 50 He 51 and Hs 120 excelled Both France and Italy had active biplanes Mussolini s Regia Aeronautica attaching great importance to the type as a fighter aircraft as late as 1941 while the Soviet Union also retained some machines like the Po 2 in front line service right through the war and beyond By the time Japan and the United States entered the war two years later they had mainly rid themselves of biplanes but even here a few specialized types lingered on *Combat Biplanes of World War II* describes many of these gallant old warriors representing the author s own personal selection from a surprisingly large range of aircraft that despite all predictions fought hard and well [Luck of the Devil](#) Robert le Page,2012-02-02 Robert le Page flew with the Fleet Air Arm from 1940 to 1945 mostly in 816 Squadron flying carrier based Fairey Swordfish He saw action mine laying off Cherbourg hunting U boats escorting convoys in the North Atlantic and Arctic seas and covering D Day Much of his early war years were aboard HMS Dasher and he was lucky to be ashore when the carrier mysteriously exploded and sank in the Clyde This decimated 816 Squadron which was eventually re equipped and then worked up to operational readiness to fly from HMS Tracker His story is full of insights into wartime naval flying For example when they were tasked with finding and attacking German E Boats they found that in a headwind these powerful boats could outdistance the Stringbag They devised a plan which was to glide as quietly as possible on their approach to the quarry and power up the engine only seconds before they attacked a plan that was unfortunately unsuccessful Once when landing in rough weather his aircraft was waved to go round again With throttle wide open the Swordfish struggled back into the air but alas the tailhook snagged the top wire of the barrier

protecting other parked aircraft The author remembered staring down from the stalling aircraft to see a terror stricken fitter gazing up at him Fortunately all survived

Wings over the Waves Graham Drucker, 2011-02-23 This is the biography of one of the Royal Navys legendary pilots BF or Daddy as he was known started his career at Dartmouth and then spent his early seagoing years in Hong Kong Nagasaki and Hiroshima His wartime experiences as a Fleet Air pilot aboard HMS Glorious included the historic air strike at Taranto and the search for the Graf Spee In May 1940 he was loaned to Coastal Command and attacked German Panzer tanks in a biplane defended Allied troops over Dunkirk and was one of only a few naval officers to fight in the Battle of Britain After a period as a test pilot at Boscombe Down he became one of only four Wing Leaders in the Royal Navy His successful leadership led to many more successes not least the crippling of Tirpitz as part of a diversionary plan in the lead up to D Day He was a superb pilot loved by all the air and ground crew under his command His reputation as a fearless and dynamic leader remains a legend today The book contains detailed and graphic accounts of aerial sorties and strikes throughout the dark days over Nazi Europe Tragically he was killed in action in July 1944 one week prior to promotion and a job ashore The book includes many of his letters and extracts from his diary

Two Navies Divided Brian Lavery, 2023-11-30 The title is derived from George Bernard Shaw s comment that England and America are two countries divided by a common language It is not intended to imply that the two navies were seriously at odds with one another but rather to suggest as in the case of language that common roots and usages varied significantly And the Second World War is a pertinent moment for comparison They fought on the same side against a common enemy for nearly four years but Britain fought the war for the survival of itself and its empire though in the long term it failed with the latter while the American government fought to maintain its influence through the balance of power its people fought for revenge for Pearl Harbor and out of a sense of justice In this new book Brian Lavery describes and analyzes the differences and similarities between the two navies and in doing so sheds fascinating light on how the naval war was fought For example both navies had spectacular failures after entering the war the Royal Navy off Norway the USN at Pearl Harbor and Savo Island Paradoxically both commenced the war with quite amateur performances by professional navies and ended with highly skilled performances by largely amateur manned forces The training systems for regular officers had flaws in both countries In Britain entry was largely dependent on family income in America on political influence But American officers probably had a broader perspective by the time they entered active service The book covers ships and weapons systems for instance the British used too many gun types in the 4 to 6in range while the Americans concentrated on the well designed 5in And the author describes conditions onboard ships British vessels were awash with alcohol which had its attractions for Americans when alongside the Americans offered ice cream in return These examples represent only a tiny proportion of the subjects covered in this stimulating analysis Aviation the marines of both navies anti submarine and mine warfare uniforms propulsion systems shipbuilding and building programs commanders and national leaders ratings and officers ship design geographical
