## **Britains Light Railways:**

The Light Railways of Britain & Ireland Anthony Burton, John Scott-Morgan, 2015-11-30 First published in 1985 by Moorland Press The Light Railways of Britain Ireland has remained unavailable for more than twenty five years until now Released by Pen Sword this is a thorough and engaging book that covers in depth the fascinating story of Britain's last railway development the Rural light railways constructed as a result of the Light Railways Act 1896 Rigorously detailed it charts the overall history of the last great railway boom in Britain the light railway boom from 1896 to the beginning of the Great War in 1914 During this period a large number of narrow and standard gauge lines were constructed in both Britain and Ireland in order to serve and open up areas in both countries that at the time lacked adequate transport links This book tells the story of how these lines were constructed and why in most cases they eventually failed due to post First World War road competition Authored by two highly acclaimed writers of transport history this is a true testament to and a timely reminder of Britain's last railway development

**Britain's Railways in the First World War** Michael Foley, 2021-09-30 It is easy to believe that the only part that Britain's railways played in the First World War was to carry the soldiers to the ships that would take them to France This couldn't be further from the truth Without the help from the railways it is unlikely that the war would have been over as quickly as it was In Britain's Railways in the First World War Michael Foley examines how the railway system and its workers proved to be a vital part of the war effort one contemporary writer even commenting that he thought they were as significant as the navy The book describes how the enlistment of railway troops for the Royal Engineers to meet the increasing transport demands of the military was to bleed the civilian system dry as skilled railwaymen were sent to work at the front In addition the military commandeered thousands of Britain's railway vehicles sending them to each of the theatres of war and turned the already stressed railway workshops away from maintaining what remained of the country's railways and rolling stock so they could produce armaments for the forces instead The book also reveals how the British were so far behind their enemies and allies in the use of railway support to the front lines that they had to plead for help from Canada
