Bristol Blitzed:

Bristol Blitzed Reece Winstone, 1976 Night Blitz John Ray, 2012-12-08 September 1940 defeated in the Battle of Britain despite their superior numbers and better equipped aircraft the Luftwaffe launched a new campaign of attack their target this time the civilian population For eight months with hardly a night s break Luftwaffe bombers pounded industrial cities and seaports in a concentrated attempt to smash Britain s war economy and destroy civilian morale It was the first time a civilian population had been subject to mass attack night after night and important lessons were to be learned on both sides If this campaign failed as it did then surely Britain could win the war In this finely structured and consistently fascinating study of the campaign Second World War historian John Ray assesses the strategies weapons and defence tactics employed throughout the Night Blitz He graphically recalls the effects of the Blitz on British cities industry and people month by month This was the war at home when terror fell indiscriminately from the skies Yet despite all the death and destruction the spirit of the British people remained undaunted even in their darkest hours The Spirit of the Blitz Paul Addison, Jeremy A. Crang, 2020-08-06 During the Blitz the morale of the British people was clandestinely monitored by Home Intelligence a unit of the Ministry of Information that kept watch on the behaviour and opinions of the public and eavesdropped on their conversations Drawing on a wide range of intelligence sources from every region of the United Kingdom a small team of officials based at the Senate House of the University of London compiled secret reports on the state of popular morale as the Luftwaffe attacked Britain s major towns and cities between September 1940 and May 1941 Edited and introduced by two leading historians of the period who tell the inside story of Home Intelligence and why it proved so controversial in Whitehall the complete and unabridged sequence of reports provide us with a unique and extraordinary window into the mindset of the British during a momentous period in their history Not only do they include in depth reports on the effects of the bombing including special reports on Coventry Clydebank Hull Barrow in Furness Plymouth Merseyside and Portsmouth but also insights into almost every aspect of everyday life in Britain as well as the response of the public to the shifting military fortunes of the war Reading like the collective diary of a nation the reports strip away the nostalgia that has grown up around the period reminding us instead of the sufferings and sacrifices the many frustrations and difficulties of daily life the administrative bungling the grumbling and petty jealousies and the determination of the overwhelming majority to put up with it all for the sake of beating Hitler The Conservation Movement Miles Glendinning, 2013 Winner of the 2016 Antoinette Forrester Downing Award presented by the Society of Architectural Historians In many cities across the world particularly in Europe old buildings form a prominent part of the built environment and we often take it for granted that their contribution is intrinsically positive How has that widely shared belief come about and is its continued general acceptance inevitable Certainly ancient structures have long been treated with care and reverence in many societies including classical Rome and Greece But only in modern Europe and America in the last two centuries has this care been elaborated and

energised into a forceful dynamic ideology a Conservation Movement infused with a sense of historical destiny and loss that paradoxically shared many of the characteristics of Enlightenment modernity The close inter relationship between conservation and modern civilisation was most dramatically heightened in periods of war or social upheaval beginning with the French Revolution and rising to a tragic climax in the 20th century age of totalitarian extremism more recently the troubled relationship of heritage and global commercialism has become dominant Miles Glendinning s new book authoritatively presents for the first time the entire history of this architectural Conservation Movement and traces its dramatic fluctuations in ideas and popularity ending by questioning whether its recent international ascendancy can last indefinitely
