## **British Inner Cities:**

*Britain's Inner Cities* Paul Lawless, 1989-08-28 The problems of Britain's inner cities loom larger in political debate. Issues such as declining jobs, deteriorating housing conditions, poverty, crime, and diminishing service provision have affected all the major conurbations. In an effort to moderate these problems, governments since 1977 have introduced various urban initiatives such as partnerships, enterprise zones, urban development corporations, and task forces. These and other programmes are comprehensively evaluated in this completely revised Second Edition. The book adopts a threefold structure. In Part One, inner city policy since 1977 is located in its historical context and in contemporary economic, social, and demographic processes. In Part Two, the major urban initiatives since 1977 are assessed. One chapter deals with the Labour government's approach to the problem in the late 1970s. The succeeding three chapters examine programmes introduced by Conservative governments elected since 1979. Two other chapters evaluate contributions made by local government and by nongovernmental organizations. In Part Three, the author develops three elements: an overview of inner urban policy as a whole, a consideration of explanatory devices, and some suggestions for reform. *Britain's Inner Cities* Monica Charlott, 1994

**Desertification** Nick Middleton, 1991      **Inner Cities Policy** Great Britain. Department of the Environment, Great Britain. Inner Cities Directorate, 1983      **Towns, Plans and Society in Modern Britain** Helen Meller, 1997-08-07 In this concise survey Helen Meller aims to explore the interaction of the social and physical environment of cities. All modern societies have experienced mass urbanisation and have been subject to the economic, social, and technological forces which have produced this urbanisation. Yet all towns and cities are not the same. The author points out that historical and cultural factors have played and are still playing an important part in shaping responses to these forces. This becomes even more clearly evident when the urban environment becomes subject to planning. Urban regeneration has facilitated not just an improvement in the physical environment of cities but in their economic and social fortunes as well. This study is an accessible analysis of the way in which social, cultural, and physical factors have created the quality of life in British cities over the past two centuries. *Deprivation, State Interventions and Urban Communities in Britain, 1968-79* Peter Shapely, 2017-08-16 Focusing on a series of policy initiatives from the late 1960s through to the end of the 1970s, this book looks at how successive governments tried to address growing concerns about urban deprivation across Britain. It provides unique insights into policy and governance and into the socio-economic and cultural causes and consequences of poverty. Starting with the impact of redevelopment policies, immigration, and the rise of the inner city, this book examines the pressures and challenges that explain the development of policy by successive Labour and Conservative governments. It looks at the effectiveness and limits of different community development approaches and at the inadequacies of policy in tackling urban deprivation. In doing so, the book highlights the restricted impact of pilot projects and reform of public services in resolving deprivation, as well as the broader limits of social planning and state welfare. Crucially, it also plots the shift in policy

from an emphasis on achieving statutory service efficiencies and rolling out social development programmes towards an ever greater stress on regeneration and support for private capital as the solution to transforming the inner city *British Inner Cities in [1978]* N.
