*British Birds*, 1926      **British Birds' Eggs** Alexander Francis Lydon, 1910      **The Atlas of Wintering Birds in Britain and Ireland** Peter Lack, 2010-11-30 This companion volume to *The Atlas of Breeding Birds of Britain and Ireland* is derived from surveys of birds present in Britain and Ireland during the three winters 1981-82, 1982-83 and 1983-84. The surveys were organised by the British Trust for Ornithology and the Irish Wildbird Conservancy as were the earlier breeding birds surveys. The Winter Atlas maps 200 species, 192 of which have full page two colour maps faced by a page of text. The texts written by over 100 specialists comment on the survey results, the species generally and the distribution and abundance as mapped. In addition, there are introductory chapters on the maps, the weather in the three winters, bird patterns and movements, and appendices describing the planning, organisation, field methods and processing of the survey data from record cards to computer output and maps. A team of 23 artists led by Robert Gillmor has provided the line drawings which head the species accounts.
