Green Plastics E. S. Stevens,2020-06-16 Plastics are everywhere Bags bank cards bottles and even boats can all be made of this celebrated but much maligned material Yet most of us know next to nothing about plastics We do know that they are practical and cheap but they also represent a huge environmental problem for they literally take ages to decompose In this engaging book E S Stevens tells us everything we have always wondered about plastics and of the efforts in America Europe and Asia to develop a new breed of environmentally friendly plastics He points to a possible future where plastics will no longer be made of petroleum but of plants The first two chapters assess the increased use of plastics as a relatively new alternative to other materials The third chapter introduces us to their impact on the environment and strategies for their disposal or recycling The next two chapters cover basic concepts and terms used in polymer sciences and provide some basic chemistry With these fundamentals in tow the author compares how petroleum based and biological polymers are made and the various ways in which they decompose He acquaints readers with the emerging technologies their commercial viability and their future Finally instructions are given for preparing basic bioplastics using readily available materials Nonspecialists will find Green Plastics a concise introduction to this exciting interdisciplinary topic an introduction otherwise not available For students it provides easy entry to an area of science with wide appeal and current importance for teachers excellent background reading for courses in various sciences The prospect of depleted fossil fuel supplies and the potential benefits of bioplastics to the environment and to rural areas that could supply the raw materials make this book a compelling presentation of a subject whose time has come Engineering ,1903 Bulletin - Canadian Library Association Canadian Library Association,1977 Canadian Library Journal ,1978 The Timbers of Commerce and Their Identification Herbert Stone,1918 **American Machinist** ,1917 **British Mining** Robert Hunt,1887 **The Geology of England and Wales** Horace Bolingbroke Woodward,Edwin Tulley Newton,1887
