British Labour Seeks A Foreign Policy 1900 1940:

British Labour Seeks a Foreign Policy, 1900-1940 Henry Winkler, 2017-10-24 Since World War II the British Labour Party has played a central role in dealing with complex international issues. Achieving real power in parliament for the first time, Labour governments have acted responsibly and are usually in accord with the views of a substantial majority of the British people. Such was not always the case. In *British Labour Seeks a Foreign Policy 1900 1940* Henry R Winkler synthesizes twenty years study of the subject to offer the first full scale treatment of the Labour Party's evolution in foreign affairs. The Labour Party came into existence at the beginning of the twentieth century to deal with the domestic problems of the working class and it showed relatively little interest in foreign policy issues. In the aftermath of World War I however small groups of moderates made the case against the bitter rejection of the Versailles Treaty by many in the Labour Party and the trade union movement. Most of these argued that the League of Nations could be used to remedy some of the deficiencies of the settlement and that such a League must have the sanction of force if it was to be effective. During the 1930s the failures of the League in the Far East, Abyssinia, Spain and Central Europe compelled some of its advocates to conclude that League or no League the threat from Nazi Germany mandated support for a program of preparedness and rearmament even under the aegis of a hated National Government. The result by 1937 was the final formal abandonment of many of the radical illusions of the twenties and thirties as Labour reluctantly but formally assumed a posture that enabled it to share in the governance of wartime Britain and to take a key role in dealing with the international issues that emerged in the aftermath of the Second World War. This volume contains valuable lessons on the responsibilities of political parties as well as the pros and cons of specific policies. It is essential reading for understanding Britain's later stands as its leaders tried to adjust to Britain's diminished power in the post World War II world.

Campaigning for Life Peta Dunstan, 2018-11-29 Dorothy Buxton led a remarkable life. In an era when women struggled to make their voices heard in the public arena she spoke out effectively for the refugee, the destitute and particularly for children. An advocate of honest reporting during the First World War in the aftermath she refused to accept the widespread famine that followed. In the face of scepticism and hostility she campaigned to provide food for starving children in post 1918 Europe and pioneered the charity Save the Children. Her efforts saved thousands of lives. In later years she was one of the first to raise awareness of anti-Semitism in Nazi Germany, courageously confronting Herman Goring himself in Berlin in early 1935. She was tireless in her fight for those suffering from prejudice and discrimination. Her story is unusual from her unconventional upbringing in rural Shropshire to studying at Cambridge to emerging as an indefatigable campaigner. Dorothy was a complex and compelling character, somewhat of an enigma even to her family. *Campaigning for Life* is the first biography of this remarkable woman which examines both her public and private life in detail and crucially acknowledges her considerable achievements in one of the most turbulent periods of European history.

Strange Allies Andrew Webster, 2019-07-02 *Strange Allies* examines three intersecting themes of fundamental

importance to the international history of the period between the two world wars First and most broadly it is a study of the international history of the pivotal hinge years running from the onset of the Depression in late 1929 to the Nazi capture of power in Germany in early 1933 The second theme is the strategic relationship between Britain and France the critical dynamic in the management of global and European international relations during this time of great fluidity and uncertainty The most contentious and intractable issue that divided the two countries was the pursuit of international disarmament which forms the third theme of the book *Strange Allies* is based upon extensive research in British and French archives as well as in the archives of the League of Nations in Geneva The book's focus on 1929-31 in particular makes a major contribution to the international history of the interwar period by re-examining the security and strategic policies of the second Labour government in Britain and of foreign minister Aristide Briand in the post-Locarno years in France For 1931-33 the book looks at the impact of the great financial and economic crisis of 1931 on security and disarmament planning in Britain and France It then considers the impact of the Anglo-French relationship on the instability of Europe and on the failure of the World Disarmament Conference This book is the first detailed study of the Anglo-French relationship during a critical period which saw a reshaping of the boundaries of global security Although the Anglo-French alliance is rightly seen to be pivotal to both the initial phase of implementing the Versailles settlement of 1919 and the efforts to contain Hitler and protect Europe after 1936 *Strange Allies* demonstrates the degree to which these states' conflicting views of security were central to international relations in the years leading up to Hitler's accession to power

The Postwar Moment Isser Woloch, 2019-01-22 An incisive comparative study of the development of Post World War II progressive politics in Britain France and the United States Toward the end of World War II the three democracies faced a common choice: return to the civic order of prewar normalcy or embark instead on a path of progressive transformation In this ambitious and original work Isser Woloch assesses the progressive agendas that crystallized in each of the allied democracies their roots in the interwar decades their development during wartime the struggles to enact them in the early postwar years and the mixed outcomes in each country *The Postwar Moment* examines three progressive postwar manifestos that reveal a common agenda in the three nations The issues at stake included priorities for reconstruction or reconversion full employment via economic planning price controls the roles of trade unions expansion of social security national health care public housing and educational reform A highly regarded scholar of European history Woloch persuasively adds the United States to a discussion that is usually focused solely on Europe

Liberal Internationalism M. Pugh, 2012-09-28 The book investigates the role of popular liberal internationalism as a social movement in Britain using Gramscian and Foucauldian ideas of civil society It addresses the use of force for peace through an examination of the impact of civil society actors in popular liberal internationalism between the world wars
