**Crisis? What Crisis? Orderly Workouts for Sovereign Debtors** Barry J. Eichengreen, Richard Portes, 1995 Collected the research papers examining whether there are lessons to be learned from the debt restructuring experience of the 1980s and earlier periods which could point the way towards a more orderly approach to the resolution of future sovereign debt crises and command a measure of international agreement

**The International Law of Sovereign Debt Dispute Settlement** Kei Nakajima, 2022-09-22 The first two decades of the twenty first century witnessed a series of large scale sovereign defaults and debt restructurings in which sovereigns struggled to negotiate with recalcitrant bondholders particularly hedge funds Also the outbreak of the COVID 19 pandemic in 2020 heralded a bleak financial outlook for many developing and emerging market countries requiring sovereign debt restructuring in times of great macroeconomic uncertainty Given the absence of a multilateral mechanism for sovereign debt restructuring equivalent to domestic corporate bankruptcy system however defaulted sovereigns often suffer from holdout litigation wrought by bondholders This book proposes ways in which such legal actions could be regulated without the undue expense of bondholders remedies by exploring the mechanism of balancing bondholder protection and respect for sovereign debt restructuring at various stages of litigation and arbitration proceedings

enhanced financial cooperation by setting up the Chiang Mai Initiative These developments raise many questions What is best practice regional policy dialogue How is a regional financial architecture complementary to the global architecture What sorts of institutions work well at a regional level Do regions need a regional monetary fund What is going on in East Asia and how is it different to other regions This volume brings together a range of policy practical and conceptual papers to explore these and other issues
