Withers,2016-04-15 The geography of the book is as old as the history of the book though far less thoroughly explored Yet research has increasingly pointed to the spatial dimensions of book history to the transformation of texts as they are made and moved from place to place from authors to readers and within different communities and cultures of reception Widespread recognition of the significance of place of the effects of movement over space and of the importance of location to the making and reception of print culture has been a feature of recent book history work and draws in many instances upon studies within the history of science as well as geography *Geographies of the Book* explores the complex relationships between the making of books in certain geographical contexts the movement of books epistemologically as well as geographically and the ways in which they are received **Editing the Image** Mark Cheetham,Elizabeth Legge,Catherine M. Soussloff,2008-11-29 The editing process is a vital part of virtually every form of media Primarily associated with texts and written language editing is equally essential if less examined in

regard to visual media *Editing the Image* looks at the editing of visual media as both a series of technical exercises and as an allegory. It touches on concerns that are crucial to the history of art and visual culture as well as those media and institutions that produce and disseminate the visual arts in our society. Featuring contributors from a wide range of disciplines, *Editing the Image* considers editing in the context of academic journals, art historical texts, illustrated books, museum displays, and exhibitions. It is an inclusive analysis of visual forms commonly associated with the process of editing: photography, film, and video, as well as some that are not intrinsically linked to editing: painting, sculpture, and architecture. In addition to wide-ranging academic considerations, this collection includes discussions of moving picture media and studio art by practitioners, giving the study a practical focus. For anyone who has considered the implications of the editorial process, this work will be of significant interest.

North America's Indian Trade in European Commerce and Imagination, 1580-1850 George Colpitts, 2013-11-29 In *North America's Indian Trade in European Commerce and Imagination*, Colpitts offers new perspectives on Europe's contact with America by examining the ideas, debates, and questions arising in the trading that linked newcomers with Native people. European capitalization of the Indian Trade beginning in the 16th century forced newcomers to confront the meaning and legitimacy of traditional gift economies and assess the vice and virtue of the commerce they pursued in the New World. Making use of French and English colonization texts, published narratives, and state colonial papers, the author explores how European capital investments, credit, profits, and commercial linkages elaborated and complicated understandings of North American people in the period of colonization.

Remembering the Early Modern Voyage M. Fuller, 2008-05-12 This book investigates the operations of memory over time through three case studies: the famous anthology by Richard Hakluyt memorializing the feats of Elizabethan voyagers; the eccentric autobiography of Captain John Smith and the little-known history of early modern Newfoundland.
