Introduction to Curriculum Design in Gifted Education Kristen R. Stephens, Frances A. Karnes, 2021-09-03 Gifted students require a curriculum that intentionally aligns with their advanced abilities to ensure engagement at the appropriate level of intensity and depth. Introduction to Curriculum Design in Gifted Education offers an in-depth exploration of curriculum development for the gifted. Included are the general foundations of good curriculum design, a survey of curriculum models appropriate for gifted learners, an examination of design considerations across content areas, a detailed analysis of the role assessment has in the curriculum development process, and an exploration of trends and future directions of curriculum development for the gifted. Each chapter is authored by experts with considerable knowledge pertaining to curriculum implications for gifted students and is written with the practitioner in mind to facilitate effective implementation. This text is an essential addition to the library of any educator seeking to create new and/or adapt existing curriculum to better address the interests and abilities of gifted students.

Creating Equitable Services for the Gifted: Protocols for Identification, Implementation, and Evaluation Nyberg, Julia L., Manzone, Jessica A., 2021-11-12 Given the importance of the development of intellectualism and the need to ensure equity and access to learning experiences, educators at all levels must be aware of research-based protocols to identify, serve, and evaluate programs for diverse gifted learners. It is essential to understand how gifted education can increase equity in identification practices for historically underrepresented groups, what the specific curricular opportunities are that must be provided to learners to develop gifted programs, and what the key considerations are to the design and implementation of authentic and equitable programs for gifted learners. Creating Equitable Services for the Gifted: Protocols for Identification, Implementation, and Evaluation curates cutting-edge protocols in the field of gifted education related to the areas of equitable identification, implementation of services, and programmatic assessment. These protocols seek to initiate discussion and critical discourse regarding diverse gifted learners among higher education faculty, state department personnel, district administrators, and classroom teachers. Covering topics such as digital differentiation, equitable assessment, and STEM education, this text is ideal for teacher education programs, preparation programs, university degree programs, university credential programs, certificate programs, faculty graduate students, state departments of education, superintendents, coordinators, administrators, teachers, professors, academicians, and researchers.
