Critical Making in the Age of AI invites students teachers learners and digital humanists to explore making as scholarship Inspired by the craft traditions of textile arts this book combines a survey of forms of alternative scholarly communication such as comics GIFs maps games and generative AI and a pattern book where patterns serve as starting points that makers can reimagine and remix Firmly grounded in the humanities and utilizing free tools and platforms including Twine Voyant and Tracery wherever possible this engaging and accessible guide to digital methods introduces and puts into practice concepts that are essential to preparing students to navigate a changing landscape of media and information without investing in proprietary software dedicated lab space or expensive creative tools The book s eight patterns are especially appropriate for those just beginning to explore digital scholarly methods and one goal of Critical Making in the Age of AI is to provide structure for work that is both meaningful and achievable with limited resources and time By centering critical making through a design justice and feminist lens the coauthors model how inclusive and expansive approaches to making in research and teaching are vital to shaping the humanities of the future

,1913     **The Texas court reporter** ,1906     Playful Pedagogy in the Pandemic Emily K. Johnson,Anastasia Salter,2022-08-26 Educational technology adoption is more widespread than ever in the wake of COVID 19 as corporations have commodified student engagement in makeshift packages marketed as gamification This book seeks to create a space for playful learning in higher education asserting the need for a pedagogy of care and engagement as well as collaboration with students to help us reimagine education outside of prescriptive educational technology Virtual learning has turned the course management system into the classroom and business platforms for streaming video have become awkward substitutions for lecture and discussion Gaming once heralded as a potential tool for rethinking our relationship with educational technology is now inextricably linked in our collective understanding to challenges of misogyny white supremacy and the circulation of misinformation The initial promise of games based learning seems to linger only as gamification a form of structuring that creates mechanisms and incentives but limits opportunity for play As higher education teeters on the brink of unprecedented crisis this book proclaims the urgent need to find a space for playful learning and to find new inspiration in the platforms and interventions of personal gaming and in turn restructure the corporatized surveilling classroom of a gamified world Through an in depth analysis of the challenges and opportunities presented by pandemic pedagogy this book reveals the conditions that led to the widespread failure of adoption of games based learning and offers a model of hope for a future driven by new tools and platforms for personal experimental game making as intellectual inquiry     English Mechanic and Mirror of Science and Art ,1910     **CRIME AND PUNISHMENT AND THE CRITICS** ,1961     **A Critical Examination of Dr. G.
