Annual Report of the Agricultural Research Institute of Ontario Agricultural Research Institute of Ontario,1965

Annual Report Ontario. Department of Agriculture,1966 **Yields of Farmed Species** R. Sylvester-Bradley,Julian Wiseman,2005 Presenting various solutions to issues facing the yields of farm species this perceptive study debates such topics as to what extent pests pathogens competing demands for resources or scruples about farming processes will curtail our ability to innovate in food production *Applying Photosynthesis Research to Improvement of Food Crops* Jill E. Gready,Simon A. Dwyer,John R. Evans,2013 The major focus of crop productivity research in recent decades has been on improving drought and salt tolerance water and fertiliser use efficiency and disease and pest control However by themselves they are unlikely to be sufficient to meet future food security demands Therefore it is time to look at new approaches including increasing the photosynthetic efficiency of crop plants better using the non limiting inputs of sunlight and carbon dioxide from the air ACIAR sponsored a workshop at the Australian National University that addressed strategies for developing and applying research on photosynthesis to improving food crops The papers are published in these proceedings

Omics Approaches for Sugarcane Crop Improvement Rajarshi Kumar Gaur,2022-12-30 In this book the information encompasses various researchable biotechnology aspects of sugarcane its genomic structure diversity comparative and structural genomics data mining etc This book explores both the theoretical and practical aspects of sugarcane crops focusing on innovative processes This book argues in favor of developing an integrated research and development system to strengthen the research and development capabilities of all the areas of sugarcane Further it covers the recent trends of

sugarcane biotechnology especially in the next generation sequencing NGS era This book will be very useful for professors and scientists who are working in the area of sugarcane crops by using molecular biology and bioinformatics It is also useful for students to use as a reference for their classes or thesis projects Key features Discusses an integral part of molecular biology and pivotal tools for molecular breeding enables breeders to design cost effective and efficient breeding strategies for sugarcane Discusses the harnessing genomics technologies for genetic engineering and pathogen characterization and diagnosis of sugarcane Provides new examples and problems added where needed Provides insight from contributors drawn from around the globe

Water Stress in Crop Plants and Its Management Prabhat Kumar Srivastava, Parul Parihar, Richa Upadhyay, 2025-05-13 The book provides an overview of water stress in plants and alterations in the physiology morphology anatomy and molecular mechanism due to water stress The induction of water stress hormones and the up regulating genes synthesizing them is also the major thrust of the book It also deals with the water and nutrient uptake alteration in water relations transpiration and stomatal conductance and hence in the amount of photosynthesis vis vis water stress It compiles recent studies on redox regulation antioxidative systems nitrogen metabolism and phytohormonal regulation in crop plants during water stress Different strategies to manage water stress viz by using different osmolytes proteins hormones and growth regulators antioxidants plant extracts nitric oxide donors macro and micro mineral nutrients and the use of silicon have been discussed The viability of different biotechnological tools to make crop plants less water demanding the use of vetiver grass and the insertion of mycorrhiza in water stressed crop plants have been explored An exhaustive review of recent literature encompassing genomic proteomic transcriptomic ionomics and metabolomics approaches to have a better understanding of water stress is the prominent feature of the present book It discusses major signaling molecules involved in water stressed environments as well as the crosstalk with other minerals phytohormones etc Not least the book endeavors to illustrate different water conservation methods to achieve sustainable agriculture The book is a comprehensive compilation of work to date on water stress and its management techniques and this will bridge the missing gap between the research from the past to the current time
