*Bull Threshers and Bindlestiffs* Thomas D. Isern, 2021-10-29 *Bull Threshers and Bindlestiffs* is a panorama on a continental canvas the Great Plains of North America stretching from Texas to Alberta Onto this surface the author lays the large features of regional practice in the harvesting and threshing of wheat during the days before the combined harvester harvesting with binder and header threshing with bull thresher and steam engine Into the picture he places the key figures who accomplished the task of gathering the grain the farm men and women the custom threshermen and the bindlestiffs or itinerant laborers Affectionately he sketches the small details of folklife that comprised the everyday work and culture of the wheat belt building shocks loading racks constructing stacks pitching bundles into the separator hauling water to the engine drinking deep from the crockery water jug *Bull Threshers and Bindlestiffs* is a profusely illustrated study of a complex vigorous regional culture concerned with the production of wheat a culture that centered around the annual harvest and declined with the advent of the combine This is an examination of the interaction of culture environment and technology with import for the fields of agricultural history and regional history More than that with its grassroots research its descriptions of tools and customs and its lavish illustrations it is a re creation of a proud phase of regional life previously captured only in yellowed albumen photographs

**Bull Threshers and Bindlestiffs** Thomas Dean Isern, 1990 *The Hobo* Robert Suits, 2026-06-16 A panoramic history of America s first climate migrants From the mid nineteenth century through the dust bowl years of the Great Depression a new kind of migrant worker became a familiar sight in communities across America The Hobo traces the journeys of these homeless men and women showing how hobo work was an adaptation to energy transitions and a harsh and unpredictable climate and how the hobo played a central role in the histories of industrialization and westward expansion Challenging common depictions of the hobo as a world weary bearded man in ragged clothes Robert Suits reveals how these wandering laborers were often fastidious and heartbreakingly young Forever on the move due to economic hardship and climate disaster they chased harvests and took seasonal jobs in industries like logging and mining Too often they couldn t find employment at all Suits describes the difficult dangerous and highly unstable jobs they worked while shedding light on the hobo life and philosophy from their techniques for stowing away on railroads to their unique blend of socialist anarchist and anti work thought He traces the emergence of the hobo to the advent of steam and the need for manual laborers in places where this new technology couldn t reach and describes how a growing reliance on the internal combustion engine brought an end to hobo work Drawing on oral histories environmental data and cutting edge digital methods The Hobo paints an unforgettable portrait of an eclectic group of wandering radicals troublemakers poets and writers demonstrating how their experiences upend some of our basic assumptions about how environments and technologies shape society

**Indispensable Outcasts** Frank Tobias Higbie, 2003 Often overlooked in the history of Progressive Era labor the hobo who rode the rails in search of seasonal work have nevertheless secured a place in the

American imagination The stories of the men who hunted work between city and countryside men alternately portrayed as either romantic adventurers or degenerate outsiders have not been easy to find Nor have these stories found a comfortable home in either rural or labor histories Indispensable Outcasts weaves together history anthropology gender studies and literary analysis to reposition these workers at the center of Progressive Era debates over class race manly responsibility community and citizenship Combining incisive cultural criticism with the empiricism of a more traditional labor history Frank Tobias Higbie illustrates how these so called marginal figures were in fact integral to the communities they briefly inhabited and to the cultural conflicts over class masculinity and sexuality they embodied organizing materials of the Industrial Workers of the World and presents a complex and compelling portrait of hobo life from its often violent and dangerous working conditions to its ethic of transient mutuality that enabled survival and resistance on the road More than a study of hobo life this interdisciplinary book is also a meditation on the possibilities for writing history from the bottom up as well as a frank discussion of the ways historians fascination with personal narrative has colored their construction and presentation of history Back cover The Agrarian Origins of American Capitalism Allan Kulikoff,1992 Allan Kulikoff s provocative new book traces the rural origins and growth of capitalism in America challenging earlier scholarship and charting a new course for future studies in history and economics Kulikoff argues that long before the explosive growth of cities and big factories capitalism in the countryside changed our society the ties between men and women the relations between different social classes the rhetoric of the yeomanry slave migration and frontier settlement He challenges the received wisdom that associates the birth of capitalism wholly with New York Philadelphia and Boston and show how studying the critical market forces at play in farm and village illuminates the defining role of the yeomen class in the origins of capitalism

*Repositioning North American Migration History* Marc S. Rodriguez,2004 An in depth look at trends in North American internal migration This volume gathers established and new scholars working on North American immigration transmigration internal migration and citizenship whose work analyzes the development of migrant and state level institutions as well as migrant networks With contemporary migration research most often focused on the development of transnational communities and the ways international migrants maintain relationships with their sending region that sustain the circularflow of people ideas and traditions across national boundaries it is useful to compare these to similar patterns evident within the terrain of internal migration To date however international and internal migration studies have unfolded in relative isolation from one another with each operating within these distinct fields of expertise rather than across them Although there has been some important linking there has not been a recent major consideration of human migration that works across and within the various borders of the North American continent Thus the volume presents a variety of chapters that seek to consider human migration in comparative perspective across the internal international divide Marc S Rodriguez is Assistant Professor of History at Princeton University Donna R Gabbaccia is the Mellon Professor of History at the

University of Pittsburgh James R Grossman is the Vice President of Research and Education at the Newberry Library Chicago Contributors Josef Barton Wallace Best Donna Gabbaccia James Gregory Tobias Higbie Mae Ngai Walter Nugent Annelise Orleck Kunal Parker Kimberly Phillips Bruno Ramirez Marc Rodriguez *Repositioning North American Migration History* is a volume in *Studies in Comparative History* sponsored by Princeton University's Shelby Cullom Davis Center for Historical Studies

*Irrigated Eden* Mark Fiege, 2009-11-23 Irrigation came to the arid West in a wave of optimism about the power of water to make the desert bloom Mark Fiege's fascinating and innovative study of irrigation in southern Idaho's Snake River valley describes a complex interplay of human and natural systems Using vast quantities of labor irrigators built dams excavated canals laid out farms and brought millions of acres into cultivation But at each step nature rebounded and compromised the intended agricultural order The result was a new and richly textured landscape made of layer upon layer of technology and intractable natural forces one that engineers and farmers did not control with the precision they had anticipated *Irrigated Eden* vividly portrays how human actions inadvertently helped to create a strange and sometimes baffling ecology Winner of the Idaho Library Association Book Award 1999 Winner of the Charles A Weyerhaeuser Award Forest History Society 1999 2000

*Kansas and the West* Rita Napier, 2003 By incorporating voices from history that have too long been lost in the din of tradition especially the voices of Native Americans and black women and laborers *Kansas and the West* provides a provocative and much needed new view of the state's past

***Our Town on the Plains*** James R. Shortridge, Joseph Judd Pennell, 2000 *Our Town on the Plains* reproduces more than one hundred of Pennell's best photographs to open up a window on the past

*The North Dakota Quarterly*, 2008

***Red Earth*** Bonnie Lynn-Sherow, 2004 Before the great Land Rush of 1889 Oklahoma territory was an island of wildness home to one of the last tracts of biologically diverse prairie In the space of a quarter century the territory had given over to fenced farmsteads with even the racial diversity of its recent past simplified In this book Bonnie Lynn Sherow describes how a thriving ecology was reduced by market agriculture Examining three central Oklahoma counties with distinct populations Kiowas white settlers and black settlers she analyzes the effects of racism economics and politics on prairie landscapes while addressing the broader issues of settlement and agriculture on the environment Drawing on a host of sources oral histories letters and journals and agricultural and census records Lynn Sherow examines Oklahoma history from the Land Rush to statehood to show how each community viewed its land as a resource what its members planted how they cooperated and whether they succeeded Anglo settlers claimed the choice parcels introduced mechanized farming and planted corn and wheat blacks tended to grow cotton on lands unsuited for its cultivation and Kiowas strove to become pastoralists Lynn Sherow shows that as each group vied for control over its environment its members imposed their own cultural views on the uses of nature and on the legitimacy of the other in their own relationship with the red earth Lynn Sherow further reveals that racism both institutionalized and personal was a significant factor in determining how where by whom and to what ends land was used in

Oklahoma She particularly assesses the impact of USDA policy on land use and by extension environmental and social change As agricultural agents railroads and local banks encouraged white settlers to plant row crops and convert to market farms they also discriminated against Indians and blacks And as white settlers prospered they in turn altered the relationship of Indians and African Americans with the land The transformation of Oklahoma Territory was a protracted power struggle with one people s relationship to the land rising to prominence while banishing the others from history Red Earth provides a perceptive look at how Oklahoma quickly became homogenized mirroring events throughout the West to show how culture itself can be a major agent of ecological change *John Brown to Bob Dole* Virgil W. Dean,2006 From radical abolitionist John Brown to presidential candidate Bob Dole to visionary environmentalist Wes Jackson Kansas history is bursting with fascinating stories of individuals who made a difference to the nation and whose lives reveal much about our collective past Prominent Kansas historian Virgil Dean has gathered a distinguished team of writers Thomas Isern Craig Miner and others who have crafted incisive portraits of 27 notable men and women covering 150 years of Kansas and American history Here are agitators who moved their fellow citizens to action over political social and economic problems not only John Brown but also proslavery agitator William H Russell Mary Elizabeth Lease lecturer for the Farmers Alliance and Populist Party Gerald B Winrod a k a the Jayhawk Hitler and Esther Brown who challenged segregation in public schools **Montana** ,1999

**Harvest Wobblies** Greg Hall,2001 Increased Mechanization and the expansion of new markets transformed the face of American farming in the early decades of the twentieth century especially in the American West These changes demanded a new kind of agricultural worker gone was the local farmhand replaced by a cheap and temporary labor force of migrant and seasonal workers Greg Hall s fascinating book analyzes how harvest Wobblies members of the Industrial Workers of the World IWW organized these men women and sometimes children who had become so essential and yet so exploited on the farms of the West Although harvest Wobblies worked in nearly all the western states their stongholds were the Great Plains California and the Pacific Northwest regions where harmers developed monocrop agriculture and where seasonal labor was indispensable come harvest time Like their IWW brethren in logging camps and mines the harvest Wobblies combined an effort to improve the lives of workers with harger revolutionary goals Harvest Wobblies personified most of the indelible features of IWW membership they were the militant casual laborers of the American West riding the rails living in hobo jungles preaching revolution and facing repression with innovative strategies impassioned speech humor and song Through trial and error Wobbly organizers eventually implemented the idea of an industrial union in agriculture and helped the IWW to establish itself as a powerful force to be reckoned with by employers in the West In tracing the rise and the eventual fall of the harvest Wobblies Greg Hall examines the diverse and changing nature of the agricultural work force He offers a social and cultural history of a union uniquely suited to organizing tens of thousands of migrant and seasonal workers Harvest Wobblies will appeal to a broad audience of readers interested in labor history the American West U S agricultural history

and the history of the IWW      **Next Year Country** H. Craig Miner,2006 A richly textured history of the resilience and adaptability of western Kansans to survive two major depressions and the epic Dust Bowl years separated only by a brief golden age of war related prosperity Miner known as the dean of Kansas history vividly relates the people s negotiation with the high plains environment which happens to teach harsh lessons of mutability and perseverance better than most places
