Bushfires in Australia John Lesley, 2021 Along with cyclones and floods bushfires have always been part of the Australian natural environment Increasing population has meant that more homes are being built in the outer parts of cities These regions are close to natural bushland where there might be bushfires in the future Thousands of years ago Indigenous Australians developed ways of managing bushfires so that the landscapes they cared for would not suffer catastrophic destruction Today firefighters also undertake hazard reduction burns to keep areas safe from monster bushfires *Burn* Paul Collins, 2008-12-01 Dry heat and hot dry winds worked upon a land already dry to suck from it the last least drop of moisture Men who had lived their lives in the bush went their ways in the shadow of dread expectancy But though they felt the imminence of danger they could not tell that it was to be far greater than they could imagine They had not lived long enough Report of the Royal Commission into the bushfires of January 1939 With the start of every bushfire season and the first threatening hints of burning eucalypt in the air we are reminded no matter where we live that bushfire is an inescapable reality in this country In *Burn* Paul Collins tells the epic story of bushfire in Australia drawing on accounts of the most devastating conflagrations in Australia's European history from the 1851 Black Thursday fire which burnt out one quarter of Victoria to the 1939 Black Friday fires which took many lives and destroyed thousands of hectares in Victoria New South Wales South Australia and Tasmania the Canberra inferno of 2003 and the Black Saturday fires of February 2009 Frightening Compelling vivid and provocative *Burn* reveals stories of heroism stupidity political incompetence and environmental vandalism This is the grand narrative of bushfire in Australia the most fire prone land on Earth **Dark Tourism**
