**Detectability of Spread-spectrum Signals** Robin A. Dillard, George M. Dillard, 1989 A desktop reference for designers of military communication systems using spread spectrum techniques to achieve a low probability of intercept Shows how to evaluate the detectability of candidate signal structures mathematically and to select signal parameters that minimize the probability of detection

**Detectability of Spread-Spectrum Signals** Robin A. Dillard, George M. Dillard, 1989-01-01  
Detection of Spread Spectrum Signals Margaret Leone Paternina, 1991      **Principles of Spread-Spectrum Communication Systems** Don Torrieri, 2022-04-12 This textbook now in its 5th edition provides updated state of the art coverage of spread spectrum communication systems with new applications throughout the book In this edition the author extends sections with more comprehensive details about many topics Some of the more complex sections have been rewritten to make them easier to understand New subsections sections figures and problems have been added throughout the book New or expanded topics include frequency hopping systems with multisymbol CPFSK detection derivations of spread spectrum systems with differential data modulations chaotic systems channel state information and MIMO As with previous edition the author presents mathematical analyses of spread spectrum systems that provide insights into their operations and limitations and are of theoretical and practical interest to both researchers and system designers He includes updated problems at the end of each chapter which are intended to assist readers in consolidating their knowledge and to give practice in analytical techniques Eight appendices provide the mathematical tools that are useful in understanding the main text

**Detectability of a Single Sideband Spread Spectrum Radio Signal** Richard Allan Pettus, NAVAL POSTGRADUATE SCHOOL MONTEREY CALIF., 1975 A frequent requirement of spread spectrum communications is that the transmitted signal not be easily detected by an uncooperative receiver If however single sideband amplitude modulation by a digital signal is used to achieve spectrum spreading it is shown that peaks occur in the transmitted waveform These peaks may be detected with a threshold receiver The peak level dependence on bandwidth of the transmitted signal is presented The effect of bandwidth and gaussian noise on probability of detection are considered in a statistical analysis using numerical methods The analysis demonstrates the susceptibility of the waveform peaks to detection for a variety of bandwidths and noise levels Results are presented in both graphical and tabular form Author

**Detection of Direct-sequence Spread Spectrum Signals** Dong-Chang Shiue, 1985      **Modern Communications Jamming Principles and Techniques** Richard Poisel, 2011 This edition features a wealth of new material on urban warfare including a computer simulation of EW architecture alternatives for land based forces based on urban constraints It also includes an expanded section on time hopped spread spectrum communications more details on modern communication system technologies such as CDMA and OFDM and an in depth discussion on sources of urban noise This practical resource is focused on showing the reader how to design and build jammers specifically targeted at spread spectrum anti jam communications Moreover it gives assistance in

evaluating the expected performance of jamming systems against modern communications systems and discover the best waveform to use to counter communication systems designed to be effective in jamming environments While mathematical derivations in general are avoided the book presents error rate performance equations for most modern digital anti jam communication systems

**Spread Spectrum Systems for GNSS and Wireless Communications** Jack Kenneth Holmes,2007 This cutting edge resource offers a modern treatment of spread spectrum SS communications including direct sequence and frequency hopping This comprehensive volume presents the principles of design and analysis for all SS systems and places special emphasis on wireless systems and global navigation satellite systems GNSS

*Susceptibility of Spread Spectrum Signals to Detection and Exploitation* Jack P. Horzempa,1988

*Decision Rules Applied to Spread Spectrum Signal Detection* Richard Jae Kim,S. Rosenstark,J. Frank,NEW JERSEY INST OF TECH NEWARK.,1984 Decision rules for detection of spread spectrum signals were investigated For each decision rule error and erasure probabilities were analyzed The obtained data was used to plot  $P_{sub E}$  vs  $P_{sub E}$  for constant signal to noise ratio SNR With the use of the probability of a word error curves the optimum threshold setting was found for a given SNR Orthogonal signalling FSK and antipodal signalling PSK were considered for modulating the chips When the  $P_{sub E}$  vs  $P_{sub E}$  plots for FSK and PSK were compared PSK performed better than FSK by a ratio of 6 dB Finally analog and digital correlation of the received signals was investigated Compared to the performance of analog correlation the system performance for digital correlation was worse by less than 1 dB Author

Target Acquisition in Communication Electronic Warfare Systems Richard Poisel,2003-12-01 Radio communications plays an increasingly critical and growing role in today s electronic battlefield Because more and more radio signals are deployed in electronic warfare EW situations determining which ones are friendly and which are enemy has become more difficult and crucial This book arms defense systems designers and operators with the full array of traditional search mechanisms and advanced high resolution techniques for targeting radio signals deployed in electronic warfare An invaluable technical reference the book helps professionals fully understand the tradeoffs involved in designing EW target acquisition systems with less time and effort Moreover practitioners learn how to establish optimum methods for acquiring communication targets for exploitation or countermeasures The book also serves as an excellent text for graduate courses in electronic warfare
