What Causes War? Greg Cashman,2013-07-29 Now in a thoroughly revised and updated edition this classic text presents a comprehensive survey of the many alternative theories that attempt to explain the causes of interstate war For each theory Greg Cashman examines the arguments and counterarguments considers the empirical evidence and counterevidence generated by social science research looks at historical applications of the theory and discusses the theory s implications for restraining international violence Among the questions he explores are Are humans aggressive by nature Do individual differences among leaders matter How might poor decision making procedures lead to war Why do leaders engage in seemingly risky and irrational policies that end in war Why do states with internal conflicts seem to become entangled in wars with their neighbors What roles do nationalism and ethnicity play in international conflict What kinds of countries are most likely to become involved in war Why have certain pairs of countries been particularly war prone over the centuries Can strong states deter war Can we find any patterns in the way that war breaks out How do balances of power or changes in balances of power make war more likely Do social scientists currently have an answer to the question of what causes war Cashman examines theories of war at the individual substate nation state dyadic and international systems level of analysis Written in a clear and accessible style this interdisciplinary text will be essential reading for all students of international relations

Morgan's book is a comprehensive review of the logic and the practice of deterrence. Morgan highlights the difficulties involved in immediate deterrence: the use of threat to deter in a specific immediate situation. He then explores the irrationality of the strategic options that general nuclear deterrence offers. He shows how differences in theories of how decisions are made alter views of how deterrence works and how an opponent will respond to threat. Finally, he considers a way of reducing our dependence on a policy that relies on the threat of nuclear weapons. *Reviews of the first edition* This
