Developing Capacity Through Technical Cooperation Country Experiences:

Developing Capacity Through Technical Cooperation Stephen Browne, 2024-11-01 Technical co operation involving northern experts transferring expertise to the south has not always worked In fact it has sometimes been counter productive fostering a dependency on outside help rather than creating a genuine indigenous capability This study by experts from Harvard University and the UN Development Programme UNDP uses a range of country studies to analyze what has worked in the past what hasn t and how to ensure that future co operation results in genuine capacity building and ownership of the new capabilities by the recipients It aims to offer a framework for evaluating different methods to achieve these goals The volume is a companion to the earlier *Capacity for Development* and should be useful for all those working in international development as well as researchers academics and students [Developing Capacity Through Technical Cooperation](#)

Stephen Browne, 2002 First Published in 2002 Routledge is an imprint of Taylor Francis an informa company [Ownership Leadership and Transformation](#) Thomas Theisohn, Carlos Lopes, 2013-07-04 The third and final in a series this text bridges the conceptual foundations of capacity development and the difficulties and practical realities in the field It demystifies the process of capacity development to make it more user friendly The book has two parts The first shows how long standing development dilemmas can be turned into opportunities for capacity development and societal transformation It proposes a set of principles to guide the search for context specific approaches as the norm and based on these default principles the authors explore relevant issues in comprehensible stages through a capacity lens The second part is a compilation of experiences and lessons from around the world to showcase promising initiatives and innovative solutions It forms a casebook of insights and good rather than best practices on how development stakeholders can turn development dilemmas into opportunities tailored to the needs of their societies *Capacity Development for Improved Water Management*

Maarten Blokland, Guy Alaerts, Judith Kaspersma, Matt Hare, 2019-04-30 This collection of papers explains how knowledge and capacity development can contribute to improved effective water management with a digest of lessons learned in the areas of development of tools and techniques field applications and evaluation The authors are prominent practitioners capacity builders and academics within the water and capacity development sectors *Capacity Development for Improved Water Management* starts with an introduction and overview of progress and challenges in knowledge and capacity development in the water sector The next part presents tools and techniques that are being used in knowledge and capacity development in response to the prevailing challenges in the water sector and a review of experience with capacity change in other sectors In the third part a number of cases are presented that cover knowledge and capacity development experiences in the water resources and water services sectors This part also presents experiences on water education for children and on developing gender equity The fourth part provides experiences with the monitoring and evaluation of knowledge and capacity building

The United Nations as a Knowledge System Nanette Svenson, 2015-10-16 This book seeks to explore how the UN has

generated warehoused disseminated structured packaged expanded transferred and leveraged its vast resources of accumulated information and experience throughout the decades and particularly since the start of the 21st century with the introduction of more connective information and communications technology It examines the overarching objectives that have guided such activity and divides UN knowledge management into three distinct but often overlapping and intertwining categories knowledge for social and organizational learning knowledge for norm setting and knowledge for creation of products and services Svenson brings together these multiple aspects of UN knowledge management to present a holistic view of how the organization utilizes its global intelligence to educate advocate and serve member countries development Instead of looking at the UN as an international bureaucracy or as a peacekeeping policymaking humanitarian or development entity this work studies the UN as a generator and purveyor of information learning and experience in all of these areas This book will be key reading for all students and scholars of international organizations *Aid and Influence* Stephen Browne, 2022-05-01 This book turns the argument about aid effectiveness on its head Since development assistance is inherently self interested a source of soft power political manipulation and commercial opportunity its real effectiveness could arguably be judged by the strength of donor influence and not by development impact Its subjective nature means that its impact on development is often weak mainly short term and confined to limited and specific contexts Aid as influence was prevalent during the Cold War era The connection is equally strong in this century's newly bipolar world in which the contest is between western donors led by the United States and China which is spending hundreds of billions of dollars on infrastructure as a means of influence in the global South Influence permeates both bilateral and multilateral aid and in parallel with official aid the rise of global philanthropy has seen it taken up by some of today's billionaires The response by donors to the growing havoc caused by the three Cs conflict climate change and COVID 19 confirms the main findings of the book which concludes by outlining what aid without influence would look like This book draws on the author's 40 years of experience of the aid industry and will be essential reading for development students practitioners and policy makers alike
