**Japanese Economic Development** Carl Mosk,2007-11-26 This book presents three distinct approaches to understanding how and why Japan made the transition from a relatively low income country mainly focused on agriculture to a high income nation centered on manufacturing and services Making a case for over determination in economic behaviour the authors argue that individual firm level and governmental behavior is simultaneously determined by the interaction of markets norms and structures and that change over time is rarely if ever limited to the economy operating in isolation from social norms and structures

The Economic Development of Japan and Korea Chung H. Lee,Ippei Yamazawa,1990-01-08 Sponsored by the East West Center in Honolulu this volume brings together papers by a distinguished group of Korean and Japanese experts to examine the similarities and differences between the development experiences of Japan and Korea In an attempt to identify the common factors which could account for the phenomenally successful economic development of the two countries the contributors explore six topics and their roles in economic development trade government the impact of imported technology financial systems and policies agriculture and the educational and social basis of development As the first volume to present an extended comparison of the two economies in a single source The Economic Development of Japan and Korea will be of significant interest to scholars in development economics Asian studies and international economics The contributors demonstrate that although there are both similarities and differences in the economic development of Japan and Korea the two can be regarded as having followed the same general pattern of development Both countries are resource poor and have relied on trade as the engine of development In addition both governments have played an active role in economic development in marked contrast to the situation in the West By exploring in turn the role played by such factors as export trade public policy and education the contributors show that the success of Japan and Korea can be attributed to the right combination of a private market system and the autonomous state Their conclusions have important implications for the governments of other developing countries struggling with problems and issues inherent in attempts to foster sustained economic growth

Economic Growth in Japan and the USSR Angus Maddison,2013-11-05 In terms of output the USSR and Japan account for one fifth of the world s economy occupying second and third places behind the United States Japan has the world s fastest growth of per capita income and the USSR has not lagged far behind But a century ago they were static feudal societies This study analyzes the policies which enabled them to transform their economies and to catch up with the developed world The strategies of the two

nations adopted have been very different Japan has maintained small farms and factories developed a labor intensive technology and has successfully penetrated the world export markets The USSR on the other hand has created giant farms and factories and remained fairly isolated from world trade Since 1945 the USSR has devoted one eighth of her resources to military purposes Japan practically nothing In Economic Growth in Japan and the USSR Angus Maddison offers a comparative analysis of the growth experience of these two countries that greatly enlarges our knowledge of the development process A better understanding of their past experience can be particularly illuminating and relevant for economic policy in developing countries today This classic text was first published in 1969 *The Arc of Japan's Economic Development* Arthur Alexander, 2007-11-05 This core textbook is the definitive overview of the Japanese economy charting its history from before the Meiji restoration through to the contemporary scene and the implications of the ongoing financial crisis The Economic Development of Japan, 1990 **Technology and Industrial Development in Japan** Hiroyuki Odagiri, Akira Goto, Richard R. Nelson, 2019 This book studies the industrial development of Japan since the mid nineteenth century with particular emphasis on how the various industries built technological capabilities Learning from the Japanese E.
