Disability and the Life Course Mark Priestley, 2001-07-05 Disability and the Life Course first published in 2001 explores the global experience of disability using a novel life course approach The book explores how disabling societies impact on disabled people s life experiences and highlights the ways in which disabled people have acted to take more control over their own lives It provides a unique combination of analysis policy issues and autobiography offering the reader a rare opportunity to make links between the theoretical the political and the personal in a single volume The material is set in a truly international context with contributions from thirteen different countries bringing together established and emerging writers both disabled and non disabled The book bridges some important gaps in the existing disability literature by including issues relevant to disabled people of all ages and with different kinds of impairments and also by offering a unique analysis of the relationship between disability and generation in a changing world

The Oxford Handbook of Positive Psychology and Disability Erin E. Andrews-Ash, Kara B. Ayers, Dana S. Dunn, Michael L. Wehmeyer, 2026-02-13 Roughly 61 million people with disabilities live in the United States and there are many more millions of people with disabilities around the world Not surprisingly differences among and between people with disabilities are often as notable as differences between people with and without disabilities And while the lack of homogeneity among people with disabilities makes creating a valid taxonomy under this term difficult if not impossible there is commonality among and between people with disabilities that justifies an authoritative resource on positive psychology and disability That is they have experienced discrimination and marginalization as a function of their disability This expanded and updated volume assembles chapters by leading scholars in the fields of disability and positive psychology to provide a comprehensive synthesis of the state of the combined field of positive psychology and disability Chapters are organized into thematic sections beginning with an introductory section providing information on overarching themes in positive psychology

and disability The second section focuses on specific positive psychological constructs that have relevance to disability including optimism hope social well being resilience and positive education The following section examines systems that take strengths based approaches to treatment and intervention while the fourth section looks at the application of positive psychological principles in specific disciplines such as rehabilitation sciences and disability studies The final section focuses on topics that merit consideration in positive psychology and disability such as disability ethics adaptation and toxic positivity Disability has always been associated with differentness and consequently people with disabilities have throughout time been treated as such By examining disability from a strengths based perspective this volume provides a catalyst to accelerate the application of positive psychology with regard to how disability is understood

Disability & the Politics of Education Susan Lynn Gabel,Scot Danforth,2008 Disability and the Politics of Education An International Reader is a rich resource that deals comprehensively with the many aspects of the

complex topic of disability studies in education For nearly two decades global attention has been given to education as a human right through global initiatives such as Education for All EFA and the Salamanca Statement Yet according to UNESCO reaching the goals of EFA remains one of the most daunting challenges facing the global community Today millions of the world s disabled children cannot obtain a basic childhood education particularly in countries with limited resources Even in the wealthiest countries many disabled children and youth are educationally segregated from the nondisabled particularly if they are labeled with significant cognitive impairment International agencies such as the United Nations and the World Bank have generated funds for educational development but unfortunately these funds are administered with the assumption that west is best thereby urging developing countries to mimic educational policies in the United States and the United Kingdom in order to prove their aid worthiness This McDonaldization of education reproduces the labeling resource allocation and social dynamics long criticized in disability studies The authors in this volume explore these subjects and other complexities of disability and the politics of education In doing so they demonstrate the importance and usefulness of international perspectives and comparative approaches
