Photographers Peter E. Palmquist, 2000 *Photography and Political Repressions in Stalin's Russia* Denis Skopin, 2022-03-29 This book is devoted to the phenomenon of removal of people declared public enemies from group photographs in Stalin's Russia The book is based on long term empirical research in Russian archives and includes 57 photographs that are exceptional in terms of historical interest all these images bear traces of editing in the form of various marks such as blacking out excisions or scratches The illustrative materials also include a group of photographs with inscriptions left by officers of Stalin's secret police the NKVD To approach this extensive visual material Denis Skopin draws on a wealth of Stalin era written sources memoirs diaries and official documents He argues that this kind of political iconoclasm cannot be confused with censorship nor vandalism The practice in question is more harrowing and morally twisted for in most cases the photos were defaced by those who were part of victim's intimate circle his/her colleagues friends or even close family members The book will be of interest to scholars working in history of photography art history visual culture Russian studies and Russian history and politics

20 sowjetische Fotografen, Soviet photographers, photographes soviétiques, sowjet fotografen, 1990 *Snapshots of the Soul* Molly Thomasy Blasing, 2021-07-15 *Snapshots of the Soul* considers how photography has shaped Russian poetry from the early twentieth century to the present day Drawing on theories of the lyric and the elegy the social history of technology and little known archival materials Molly Thomasy Blasing offers close readings of poems by Boris Pasternak Marina Tsvetaeva Joseph Brodsky and Bella Akhmadulina as well as by the late and post Soviet poets Andrei Sen Sen kov Arkadii Dragomoshchenko and Kirill Medvedev to understand their fascination with the visual language representational power and metaphorical possibilities offered by the camera and the photographic image Within the context of long standing anxieties about the threat that visual media pose to literary culture Blasing finds that these poets were attracted to the affinities and tensions that exist between the lyric or elegy and the snapshot *Snapshots of the Soul* reveals that at the core of each poet's approach to writing the photograph is the urge to demonstrate the superior ability of poetic language to capture and convey human experience Open Access edition funded by the National Endowment for the Humanities *Photographing Central Asia* Svetlana Gorshenina, Sergei Abashin, Bruno De Cordier, Tatiana Saburova, 2022-09-06 This volume addresses new theoretical approaches in visual and memory studies that prompted to rethink of the photography of Russian Turkestan of the nineteenth and early twentieth centuries Attempts to relate the visual unknown documentations to postcolonial criticism also opened up new interpretive arenas helping to

decentralize the analysis of the history of photography The aim of this volume is to interpret photography as a specific tool that reifies reality subjectively frames it and fits it into various political ideological commercial scientific and artistic contexts Without reducing the entire argument to the binary of photography and power the authors reveal the different modes of seeing that involve distinct cultural norms social practices power relations levels of technology and networks for circulating photography and that determined the manner of its re use in constructing various images of Central Asia The volume demonstrates that photography was the cornerstone of imperial media governance and discourse construction in colonial Turkestan of the tsarist and early Soviet periods The various cases show the complex mechanisms by which images of Turkestan were created remembered or forgotten from the nineteenth until the twenty first century The book should appeal to scholars of the Russian Empire and Central Asia of history of photography and visual culture of memory studies It should be appropriate for use in upper level undergraduate courses and even a broader public
