## **East Asia In Transition Economic And Security Challenges:**

East Asia in Transition Wendy Dobson, A.E. Safarian, 2002-02-23 The HSBC Bank Canada Papers on Asia series was begun in 1995 to examine Canada's relationship with the East Asian economies and to reduce the information barriers resulting from distance and unfamiliarity in these markets Six years on from the inception of the series much has changed in the international environment The Asian economies suffered a significant crash a rapid rebound only to slow again in 2000 2001 This the sixth and last volume in the series looks to the future This new volume focuses on key issues facing the region that corporations and governments should understand including East Asian regionalization initiatives obstacles to continued rapid growth in China aging and pension reform and the changing security environment In addition the Canadian business performance six years on is re-evaluated With contributions from leading scholars intimately familiar with both Canadian and East Asian business practices these volumes are an indispensable resource for corporations and governments looking to expand their business into East Asia or for anyone who wants to better understand Canada's complex relationship with the Asian countries

**Globalisation and Economic Security in East Asia** Helen E. Nesadurai, 2012-09-11 What is the relationship between globalization and economic security Globalisation and Economic Security in East Asia is an incisive new engagement with this important question that uses detailed conceptual exploration and fresh empirical analysis Viewing traditional neorealist conceptions of economic security as overly narrow this new study suggests that any conception of economic security in the contemporary era needs to also pay close attention to the nature of global capitalism and the insecurities it generates for societies and individuals This uniquely open-ended approach to conceptualizing economic security is supported by the East Asian experience The country case studies included here reveal that while economic security has largely been posed as one of ensuring sustainable economic growth and equitable social development particularly following the 1997 to 1998 Asian financial crisis other more realist conceptions of economic security have not become irrelevant This is also an exploration of whether and how national regional and multilateral institutions as well as non-state regional mechanisms help policy makers meet the task of governing in the interests of economic security This book will be of great interest to all students and scholars of international relations international political economy of East Asia globalization and security studies

Globalisation and Economic Security in East Asia Helen Sharmini Nesadurai, 2006 What is the relationship between globalization and economic security Globalisation and Economic Security in East Asia is an incisive new engagement with this important question that uses detailed conceptual exploration and fresh empirical analysis Viewing traditional neorealist conceptions of economic security as overly narrow this new study suggests that any conception of economic security in the contemporary era needs to also pay close attention to the nature of global capitalism and the insecurities it generates for societies and individuals This uniquely open-ended approach to conceptualizing economic security is supported by the East Asian experience The country case studies included here reveal that while economic

security has largely been posed as one of ensuring sustainable economic growth and equitable social development particularly following the 1997 to 1998 Asian financial crisis other more realist conceptions of economic security have not become irrelevant This is also an exploration of whether and how national regional and multilateral institutions as well as non state regional mechanisms help policy makers meet the task of governing in the interests of economic security This book will be of great interest to all students and scholars of international relations international political economy of East Asia globalization and security studies Security Challenges and Military Politics in East Asia Jongseok Woo,2011-02-24

*The Nexus of Economics, Security, and International Relations in East Asia* Avery Goldstein,Edward D. Mansfield,2012-08-29 While over the last 30 years the global economy s center of gravity has shifted to East Asia the region has remained surprisingly free of interstate military conflict Yet this era of peace and growth has been punctuated by periodic reminders of enduring security problems in the region from China s military modernization to unresolved territorial disputes to persistent tensions on the Korean peninsula This volume is one of the first to treat these issues of economics and security as interconnected rather than separate Its authors leading scholars from the U S and China shed new light on this important nexus by applying insights from a rich variety of approaches to explore and explain the dynamics of a region whose importance for students of both international political economy and international security has grown dramatically They show that both economic and security fundamentals matter if one is to understand the reasons for and evaluate the durability of East Asia s recent peace and prosperity Journal of Economic Literature ,2002 **Economic Myths** Patrick Luciani,2004 Appropriate for Economic Issues courses or as a supplement for Principles of Economics courses Improving on the distinct base laid down by the third edition *Economic Myths* Fourth Edition continues to teach economics by focusing on issues rather than theory Moving economics out of the classroom and effectively placing it within the context of the real world this book takes a stance on controversial economic issues inciting lively debate and analytic thinking in the classroom By dispelling economic illusions the text is the perfect complement to introductory economics textbooks encouraging students to reflect carefully on public policy and other economic issues that are confronted daily Topics covered range from minimum wage and pay equity to the environment and free trade **Aging, Economic Growth, and Old-age Security in Asia** Donghyun Park,Sang-Hyop Lee,Andrew Mason,2012-01-01 Population aging is perhaps the single biggest economic and social obstacle confronting Asia s future The region wide demographic transition towards an older population is fundamentally reshaping the demographic landscape and is giving rise to two key socio economic challenges This timely book provides an in depth analysis of these challenges and presents concrete policy options for tackling them First the expert contributors argue Asia must find ways to sustain rapid economic growth in the face of less favorable demographics which implies slower growth of the workforce Second they contend Asia must find ways to deliver affordable adequate and sustainable old age economic security for its growing elderly population Underpinned by rigorous analysis a wide range of

concrete policy options for sustaining economic growth while delivering economic security for the elderly are then presented. These include Asia wide policy options relevant to the entire region such as building up strong national pension systems whilst other policy options are more relevant to sub groups of countries. This stimulating and informative book will be of great interest to academics, students and researchers with an interest in Asian studies, economics generally and more specifically public sector economics.

Business Horizons Kelly School of Business, 2003 **Canadian Book Review Annual** Joyce M. Wilson, 2003 PAIS Bulletin, 1989 **Asian Security in the Age of Globalization** Lui Hebron, 2024-05-03. This book examines the security challenges and opportunities that the nation states of Asia confront in an era of globalization. With consideration of the increasingly border less nature of international relations via the integrative process of globalization, this book explores the emerging threats to regional and national security in Asia. It looks beyond traditional military threats analysing non traditional aspects of security including economic, social, environmental, transnational energy, health concerns and threats posed by organized crime groups. Its approach is organized both theoretically and in a country specific case study form which provides contemporary examples of the threats faced in the region. By acknowledging that contemporary Asian security has become much more complex and complicated it highlights the uncertainty and instability that the nation states of the Indo Pacific region confront. Presenting both a globally oriented and expanded vision of Asian security, this book is an excellent resource for scholars and students of Asian Studies, International Relations and Global Studies.

**Bulletin of the Public Affairs Information Service** Public Affairs Information Service, 1989 **Public Affairs Information Service Bulletin**, 1988 Peace and Security in Indo-Pacific Asia Sorpong Peou, 2021-11-21. Peace and Security in Indo Pacific Asia is for the informed, the interested and the engaged. Sorpong Peou brings together the skills of the pedagogue with the knowledge of the scholar. Dr David Dewitt, University Professor Emeritus, Senior Scholar, York University, Toronto, Canada. Peou's excellent book provides both the lay reader and the specialist with six important theoretical frameworks which should provide the basis for better appreciation of what a security community in Indo Pacific Asia means in our world today. There are very few scholars who understand the region like Peou. Dr W. Andy Knight, Professor of Political Science, the University of Alberta, Canada. Sorpong Peou's extraordinary breadth of knowledge of both International Relations theory and the key trends in Indo Pacific Asia shines through in this authoritative analysis. Dr Richard Stubbs, Professor of Political Science, McMaster University, Canada. A pedagogical approach of the textbook that is appreciated is how the author respectfully engages with the theories of IR and is not pushing an agenda of denouncing some theories and trying to persuade the reader of others. We live in such polarizing times that it is truly refreshing to read scholarly work that avoids sensationalistic attacks on theories that have been debated for decades. Each theory in this manuscript is explored on its own terms and the reader is encouraged to figure out where they stand on these enduring debates in the context of Indo Pacific security. The approach will lead to compelling classroom discussions of

the theories and the politics of the region This book is a must read for any student or observer of security trends in the region
