Sagona, Claudia Sagona, 2004 This volume presents a framework for interpreting cultural development in the highlands of Anatolia from the earliest settlements to the recent past Begun in 1988 investigations by the University of Melbourne in cooperation with the Erzurum Museum have studied how past human societies adapted to and modified highland environments After considerations of concepts such as frontiers borders and boundaries that can be easily applied to north east Anatolia the study moves to an analysis of the complex literary tradition with a view to detailing an historical geography of the Bayburt and Erzurum regions The ethnicity of the Diauehi the identification of Sinoria of Mithradates fame and a new proposal for the route taken by Xenophon and his 10 000 troops are among the novel ideas now associated with this once neglected region The second part deals with material culture Beginning with an environmental conspectus the study presents the results of a survey carried out in Bayburt during 1988 and 1990 93 An ample catalogue of finds supplements a detailed Register of Sites To ensure comprehensiveness as complete a ceramic sequence for north east Anatolia as is possible to prepare at this stage is also provided Using both textual and archaeological data this study provides an extensive yet holistic picture of cultural change in the highlands As such it provides a valuable resource for the study of the antiquity of east Anatolia and neighbouring lands

**A View from the Highlands** Charles Burney, Charles Allen Burney, 2004 Interest in the mountainous regions of the Syro Mesopotamian plain came relatively late in the development of Near Eastern archaeology In the psyche of scholars who were attracted initially to the civilisations of the lowlands the edge of the rugged highland terrain formed a disciplinary boundary as much as a geographical one While an intial spurt of interest in the ancient mountain cultures of Anatolia was expressed in the early 1900s it was short lived Subsequently archaeological explorations in the highest altitudes in Anatolia languished until the 1950s and the arrival of Charles Burney who through a series of pioneering projects rediscovered the Kingdom of Urartu and prepared solid foundations for the future study of earlier periods Always probing and speculative Charles Burney has been a

source of inspiration for archaeologists working in the highlands of east Anatolia Trans Caucasus and north west Iran Despite the difficulties that modern political boundaries presented in this geographically broken terrain he has managed to offer engaging accounts of its pre classical past without ever losing sight of its human element The essays gathered in this volume are a reflection of an archaeological community that wishes to pay tribute to a scholar whose panoramic vision of antiquity is rivalled only by the wide extent of his generosity expressed in so many ways to fellow workers in the field Although this is a substantial volume of essays written by pupils friends and colleagues the contributors are merely representatives of a much larger number who join them in honouring him An Architecture of Survival Garbis Armen,1992
