Dynamics Of Small Neural Populations:

Dynamics of Small Neural Populations John Milton, 1996 This book arose from a series of lectures presented at the CRM Summer School in Mathematical Biology held at the University of British Columbia in the summer of 1993 by John Milton a clinical neurologist and biomathematician In this work three themes are explored time delayed feedback control noise and statistical properties of neurons and large neural populations This volume focuses on systems composed of 2 3 neurons Such neural populations are small enough to permit experimental manipulation while at the same time being well enough characterized so that plausible mathematical models can be posed Thus direct comparisons between theory and observation are in principle possible

Memory and Brain Dynamics Erol Basar, 2004-06-23 Memory itself is inseparable from all other brain functions and involves distributed dynamic neural processes A wealth of publications in neuroscience literature report that the concerted action of distributed multiple oscillatory processes EEG oscillations play a major role in brain functioning The analysis of function related brain oscillatio
