Mining Heritage and Tourism Michael Conlin, Lee Jolliffe,2010-10-04 Many former mining areas have now lost their industrial function and are now turning to tourism for regional revitalization and community economic development The transformation process of these industrial and in some cases derelict mining sites and landscapes into an area of interest for tourists is a major challenge both for planners and for tourism managers It involves complex consideration to both the preservation of the physical site and community mining heritages as well as the health safety and environmental factors inherent in opening these vast sites to the public Mining Heritage and Tourism includes contributions from internationally recognized authorities and is the first book to focus on the issues challenges and potentials in redeveloping mines as cultural heritage attractions which are explored thematically throughout the book It draws on multidisciplinary research to consider the dichotomy between heritage preservation and tourist development goals for mining heritage sites as well as to explore the practical challenges of developing these sites These themes are illustrated by case studies from a vast range of geographical locations around the globe to offer operational insights into the planning and management of these sites for both heritage and tourism purposes as well as innovative site management techniques There has never before been a more comprehensive book on mining heritage tourism representing the latest developments in strategy policy and practices This book serves as an invaluable guide for students researchers academics and practitioners in the areas of Tourism and Heritage Management **Cézanne and the Post-Bionian Field** Robert Snell,2020-12-29 By inviting a conversation between them this book offers a nuanced introduction both to C zanne the father of modern art and perhaps the most vital body of theory in contemporary psychoanalysis post Bionian field theory as it has been evolving in Italy in the hands of Antonino Ferro Giuseppe Civitarese and others C zanne and Bion each insisting on his own truths spearheaded quite new

directions in painting and in psychoanalysis Both point us towards a crucial insight far from being isolated self contained subjects we fundamentally exist only within a larger interpersonal field C zanne s painting can give us a direct experience of this For the Italian field analysts building on Bion s work the field is accessed through reverie metaphor and dream which now come to occupy the heart of psychoanalysis Here primitive proto emotions that link us all might be transformed as C zanne transformed his sensations into aesthetic form into feelings linked to thoughts that in turn enrich and expand the field The book draws on the words of artists C zanne himself Mann philosophers Merleau Ponty Bergson art historians and theorists Clark Smith Shaw as well as psychoanalysts Bion Ferro Civitarese and others and it is the first to focus on one particular and seminal painter as a way of exploring this aesthetic and field dimension in depth and detail Aimed at psychoanalysts psychotherapists artists art historians and the general reader it suggests how far art and contemporary psychoanalysis are mutually generative

Advances in Longitudinal HCI Research Evangelos Karapanos,Jens Gerken,Jesper Kjeldskov,Mikael B. Skov,2021-08-11 Longitudinal studies have traditionally been seen as too cumbersome and labor intensive to be of much use in research on Human Computer Interaction HCI However recent trends in market legislation and the research questions we address have highlighted the importance of studying prolonged use while technology itself has made longitudinal research more accessible to researchers across different application domains Aimed as an educational resource for graduate students and researchers in HCI this book brings together a collection of chapters addressing theoretical and methodological considerations and presenting case studies of longitudinal HCI research Among others the authors discuss the theoretical underpinnings of longitudinal HCI research such as when a longitudinal study is appropriate what research questions can be addressed and what challenges are entailed in different longitudinal research designs reflect on methodological challenges in longitudinal data collection and analysis such as how to maintain participant adherence and data reliability when employing the Experience Sampling Method in longitudinal settings or how to cope with data collection fatigue and data safety in applications of autoethnography and autobiographical design which may span from months to several years present a number of case studies covering different topics of longitudinal HCI research from slow technology to self tracking to mid air haptic feedback and crowdsourcing
