Ea Remembrance:

The Authority of Experience John C. O'Neal, 2008-08-26 Sensationism a philosophy that gained momentum in the French Enlightenment as a response to Lockean empiricism was acclaimed by Hippolyte Taine as the doctrine of the most lucid methodical and French minds to have honored France The first major general study in English of eighteenth century French sensationism The Authority of Experience presents the history of a complex set of ideas and explores their important ramifications for literature education and moral theory The study begins by presenting the main ideas of sensationist philosophers Condillac Bonnet and Helvétius who held that all of our ideas come to us through the senses The experience of the body in seeing hearing smelling tasting and touching enabled individuals as John C O Neal points out to challenge the sometimes arbitrary authority of institutions and people in positions of power After a general introduction to sensationism the author develops a theory of sensationist aesthetics that not only reveals the interconnections of the period's philosophy and literature but also enhances our awareness of the forces at work in the French novel He goes on to examine the relations between sensationism and eighteenth century French educational theory materialism and idologie Ultimately O Neal opens a discussion of the implications of sensationist thought for issues of particular concern to society today
