Earliest Italy An Overview Of The Italian Paleolithic And Mesolithic:

Earliest Italy Margherita Mussi, 2006-04-11 This book aims to synthesize more than 600 000 years of Italian prehistory beginning with the Lower Paleolithic and ending with the last hunter gatherers of the early Holocene The author treats such issues as the development of social structure the rise and fall of specific cultural traditions climatic change modifications of the landscape fauna and flora and environmental adaptation and exploitation and includes detailed descriptions of the most important sites

Argonauts of the Stone Age Andrzej Pydyn, 2016-02-28 This book gives a full account of stone age seafaring presenting the archaeological evidence in the context of the changing world environment and uses ethnographic sources to broaden the readers understanding of the worlds earliest sea craft

The Prehistoric Hunter-Gatherers of South-Eastern Europe Aitor Ruiz-Redondo, William Davies, 2023-11-03 Situating the South Eastern European region at the crossroads between the Near East and the rest of Europe The Prehistoric Hunter Gatherers of South Eastern Europe provides an interdisciplinary exploration of the Balkan record of prehistoric foragers in terms of dispersal ecologies evolution and symbolism

FROM HUNTER-GATHERERS TO FARMERS Monica Mărgărit, Adina Boroneant, 2024-08-18 It is difficult to capture one s life in a few words a few photographs or even a book The papers in the present volume will hopefully reflect a part of Clive Bonsall s scientific interests during a career that has started some 45 years ago Their diversity is impressive from radiocarbon dating environmental changes human environment interactions funerary behaviour to paleogenetics and stable isotopes reconstruction of ancient diets and obsidian sourcing most of them in close connection to the hunter gatherer and first farmer communities of Europe His studies stretched over a large geographical area focusing recently mainly around the Balkans and the neighbouring regions He has conducted fieldwork in Britain Scotland Romania and Slovenia edited 9 books and published over 160 papers book chapters notes as well as book and paper reviews His main publications include *The Mesolithic in Europe* 1989 *The Human Use of Caves* 1997 *The Iron Gates in Prehistory* 2008 *Submerged Prehistory* 2011 and *Not Just for Show The Archaeology of Beads Beadwork and Personal Ornaments* 2017 His substantial work in southeastern Europe is reflected by his long standing collaboration and friendship with many Romanian and Bulgarian archaeologists and has received due recognition Clive Bonsall is an Honorary Member of both the Vasile P rvan Institute of Archaeology in Bucharest and the National Institute of Archaeology with Museum in Sofia His contribution to the archaeology of the Iron Gates has earned him the recognition of the Serbian archaeologists working in the area His many other research interests and personal collaborations are also reflected in the present volume We are grateful to all our contributors colleagues and friends new and old former students and collaborators whose archaeological interests met Clive s if only briefly We were happy to see that so many of us were able to mobilize in such a short time We would like to thank all those who answered our call and at a time when every minute of our professional lives is carefully planned in advance helped us put together this volume in less than a year They have endured and complied with our constant deadline reminders and

requests checked and re checked their manuscripts in record times gracefully complying with the comments and suggestions from the reviewers and were most patient with our editorial work Each paper was submitted to a double reviewing We would like to also thank our colleagues from various disciplines who accepted to anonymously review the contributions Their hard and serious work significantly improved the overall content of the volume The outcome has exceeded our most optimistic expectation a volume that geographically covers almost the entire European continent from Britain to Russia and Greece and touches on most important issues of hunter gather adaptations through time A volume brought together by chronological landmarks the end of the Pleistocene and the beginning of the Holocene and geographical areas but also by common approaches to issues such as human animal interactions exploitation and use of raw materials and subsistence strategies We chose to organize the papers on three main sections while within the respective theme they follow in chronological succession The archaeology of the Iron Gates opens the volume given Clive Bonsall s substantial contribution to the local early prehistory The eight contributions cover a large range of subjects from physical anthropology Andrei Soficaru re interpretation of earlier excavations and the subsequent collections Adina Boronean stone artefacts Dragana Antonovi Vidan Dimi Andrej Starovi and Du an Bori to the study of faunal remains and subsequent paleo dietary issues Adrian B l escu Adina Boronean and Valentin Radu Dragana Filipovi Jelena Jovanovi and Dragana Ran i Ivana ivaljevi Vesna Dimitrijevi and Sofija Stefanovi and osseous industries Monica M rg rit and Adina Boronean Selena Vitezovi These studies illustrate the still immense research potential of the Iron Gates region despite the fact that most of the sites have been flooded many decades ago During the editing of the volume it became obvious that while some of the contributions focused on the evidence from a certain site others were more of a regional synthesis This latter section begins with a most interesting paper bringing together world history and underwater archaeology Jonathan Benjamin and Geoff Bailey The following nine articles deal with subjects such as social inequalities seen through the study of burial practices Judith M Gr nberg lifeways adaptations and subsistence strategies of the early prehistoric communities Agathe Reingruber Mihael Budja Annie Brown and Haskel Greenfield Kenneth Ritchie raw materials acquisition and exploitation Tomasz P onka Maria Gurova Eva David exploitation management and trade of exotic goods Vassil Nikolov The nine papers focusing on individual sites present case studies that illustrate the nature of the current research the rich opportunities offered by the growing range of scientific techniques and their applications to existing collections This series of papers starts at Zemunica Cave on the coast of the Eastern Adriatic Sini a Radovi and Ankica Oros Sr en explores the Mesolithic occupations at Malga Rondonetto Paolo Biagi Elisabetta Starnini and Renato Nisbet and Grotta dell Edera Barbara Voytek in Italy the Mesolithic ornamented weapons of Motala in Sweden Lars Larsson and Fredrik Molin ending this Mesolithic journey among the shell middens on the western coast of Scotland Catriona Pickard The transition to the Neolithic happens among the beaver tools at Zamojste 2 in Russia Olga Lozovskaya Charlotte Leduc and Louis Chaix The Neolithic Age finds us further south into Bulgaria exploring the pitfields of Sarnevo

Krum Bacvarov and John Gorczyk and the gold of Varna Tanya Dzhanfezova while during the Bronze Age roe deer hunting is resurrected at Paks Gyapa in Hungary L szl Bartosiewicz and Erika G l The volume presents altogether new results in recent research and new information resulted from the study of old collections We also hope it points out directions for future research It is with great joy that we present Clive Bonsall this volume as a token of both our appreciation and friendship for his contributions to the Early Prehistory of Europe in general and of Southeastern Europe in special The Editors Hofmeyr Frederick E. Grine,2022-12-29 This edited volume provides the historical and geological background as well as the details pertaining to the morphology and morphometric assessments of a singular human cranial specimen from the Late Pleistocene discovered in Hofmeyr South Africa The chapters are divided into 4 main sections Section 1 discusses the discovery and historical context of the skull while section 2 addresses its geological and geochronological contexts through dating and stable isotope analyses Section 3 details the general morphological and morphometric analyses description 3 D reconstruction morphological comparisons and section 4 details the specific morphological analyses performed inner ear dentition endocranial morphology and size The volume will be of interest to professional and student paleoanthropologists interested in the later phases of human evolution **Climate Change and Human Responses** Gregory Monks,2017-03-21 This book contributes to the current discussion on climate change by presenting selected studies on the ways in which past human groups responded to climatic and environmental change In particular the chapters show how these responses are seen in the animal remains that people left behind in their occupation sites Many of these bones represent food remains so the environments in which these animals lived can be identified and human use of those environments can be understood In the case of climatic change resulting in environmental change these animal remains can indicate that a change has occurred in climate environment and human adaptation and can also indicate the specific details of those changes **Croatia at the Crossroads: A consideration of archaeological and historical connectivity** David Davison,Vincent Gaffney,Preston Miracle,2017-01-26 Papers focus on Croatia s particular interconnectedness in terms of social and cultural relationships with the wider region as the starting point for exploring issues across a broad chronological range from human origins to modernity *The Archaeology of Europe's Drowned Landscapes* Geoff Bailey,Nena Galanidou,Hans Peeters,Hauke Jöns,Moritz Mennenga,2020-04-09 This open access volume provides for the first time a comprehensive description and scientific evaluation of underwater archaeological finds referring to human occupation of the continental shelf around the coastlines of Europe and the Mediterranean when sea levels were lower than present These are the largest body of underwater finds worldwide amounting to over 2500 find spots ranging from individual stone tools to underwater villages with unique conditions of preservation The material reviewed here ranges in date from the Lower Palaeolithic period to the Bronze Age and covers 20 countries bordering all the major marine basins from the Atlantic coasts of Ireland and Norway to the Black Sea and from the western Baltic to the eastern Mediterranean The finds from each country are presented in their

archaeological context with information on the history of discovery conditions of preservation and visibility their relationship to regional changes in sea level and coastal geomorphology and the institutional arrangements for their investigation and protection Editorial introductions summarise the findings from each of the major marine basins There is also a final section with extensive discussion of the historical background and the legal and regulatory frameworks that inform the management of the underwater cultural heritage and collaboration between offshore industries archaeologists and government agencies The volume is based on the work of COST Action TD0902 SPLASHCOS a multi disciplinary and multi national research network supported by the EU funded COST organisation European Cooperation in Science and Technology The primary readership is research and professional archaeologists marine and Quaternary scientists cultural heritage managers commercial and governmental organisations policy makers and all those with an interest in the sea floor of the continental shelf and the human impact of changes in climate sea level and coastal geomorphology

The Archaeology of Caves in Ireland Marion Dowd,2015-01-31 The Archaeology of Caves in Ireland is a ground breaking and unique study of the enigmatic unseen and dark silent world of caves People have engaged with caves for the duration of human occupation of the island spanning 10 000 years In prehistory subterranean landscapes were associated with the dead and the spirit world with evidence for burials funerary rituals and votive deposition The advent of Christianity saw the adaptation of caves as homes and places of storage yet they also continued to feature in religious practice Medieval mythology and modern folklore indicate that caves were considered places of the supernatural being particularly associated with otherworldly women Through a combination of archaeology mythology and popular religion this book takes the reader on a fascinating journey that sheds new light on a hitherto neglected area of research It encourages us to consider what underground activities might reveal about the lives lived aboveground and leaves us in no doubt as to the cultural significance of caves in the past
