Early Medieval Architecture:

Early Medieval Architecture as Bearer of Meaning Günter Bandmann, 2005 This classic text continually in print for more than half a century analyzes the architecture of societies in western Europe up to the twelfth century that aspired to be the heirs to the Roman Empire

Early Medieval Architecture R. A. Stalley, 1999 Ranging from Gotland to Apulia Roger Stalley explores the richness and variety of European architecture in terms of the social and religious aspirations of the time with an emphasis on the symbolic significance these buildings expressed Written with style and humour the lively text includes many quotations from ancient sources providing fascinating insight into the way that medieval buildings were created and enlivening our knowledge of this period

The Origins of Medieval Architecture Charles B. McClendon, 2005-01-01 This book is the first devoted to the important innovations in architecture that took place in western Europe between the death of emperor Justinian in A D 565 and the tenth century During this period of transition from Late Antiquity to the Middle Ages the Early Christian basilica was transformed in both form and function Charles B McClendon draws on rich documentary evidence and archaeological data to show that the buildings of these three centuries studied in isolation but rarely together set substantial precedents for the future of medieval architecture He looks at buildings of the so called Dark Ages monuments that reflected a new assimilation of seemingly antithetical barbarian and classical attitudes toward architecture and its decoration and at the grand and innovative architecture of the Carolingian Empire The great Romanesque and Gothic churches of subsequent centuries owe far more to the architectural achievements of the Early Middle Ages than has generally been recognized the author argues

Early Medieval Architecture Roger Stalley, **Architecture and Ideology in Early Medieval Spain** Jerrilynn Denise Dodds, 1990 In analyzing the early medieval architecture of Christian and Islamic Spain Jerrilynn Dodds explores the principles of artistic response to social and cultural tension offering an account of that unique artistic experience that set Spain apart from the rest of Europe and established a visual identity born of the confrontation of cultures that perceived one another as alien Architecture and Ideology in Early Medieval Spain covers the Spanish medieval experience from the Visigothic oligarchy to the year 1000 addressing a variety of cases of cultural interchange It examines the embattled reactive stance of Hispano Romans to their Visigothic rulers and the Asturian search for a new language of forms to support a political position dissociated from the struggles of a peninsula caught in the grip of a foreign and infidel rule Dodds then examines the symbolic meaning of the Mozarabic churches of the tenth century and their reflection of the Mozarabs threatened cultural identity The final chapter focuses on two cases of artistic interchange between Islamic and Christian builders with a view toward understanding the dynamics of such interchange between conflicting cultures Dodds concludes with a short account of the beginning of Romanesque architecture in Spain and an analysis of some of the ways in which artistic expression can reveal the subconscious of a culture

Early Medieval Europe Christopher Tadgell, 2001 This book

traces the development of architecture in the territories of those who saw themselves as heirs to the Romans Charlemagne in the west and the Russian Czars in the east Each developed their inheritance in parallel with the attempt to develop their empires In the west church planning conformed to the typical early Christian basilican formula Development culminated in the idea of heaven as a palace prefigured here on earth by the church with God as supreme architect The conception of the church door as triumphal arch presided over by Christ the Judge is perhaps the most powerful theme of Romanesque art In the Russian empire the late Byzantine formula for planning was most commonly followed the type is represented by a string of impressive buildings from Kiev to Moscow The influence of the east led to the development of characteristic forms and nowhere is the synthesis of the oriental and occidental more bizarre than in the Cathedral of the Intercession in Moscow the pre eminent symbol of the third Rome
