The Politics of Global Competitiveness Paul Cammack, 2022 Marx predicted in *Capital* 1867 that as capitalism became global patterns of work would be transformed and workers would need to develop versatility flexibility and mobility This general law of social production as he called it is now in evidence all around us in global value chains zero hours contracts and contract work organised through digital platforms It results from competition between capitalists scientific and technological revolutions in production and incessant advances in the division of labour as production processes are broken down into ever smaller steps This book documents the leading roles of the Paris based Organisation for Economic Cooperation and Development and the Washington based World Bank as advocates of these developments They do not as generally supposed simply represent the interests of the advanced economies or the West and their transnational corporations They promote a single global model of capitalist development without limits and on a genuinely global scale It calls upon all states to adjust continually to the structural and social demands of competitiveness which they see as essential to the global hegemony of capital over labour The OECD and the World Bank propose policies that give girls and women equal access to education and paid work reform welfare to make work pay introduce flexible labour contracts that make hiring and firing easier focus education on skills that boost employability and draw workers in the developing world from the informal sector into the formal sector where they can be more productive This is the politics of global competitiveness

Poverty and Neoliberalism Ray Bush, 2007-04-20 Why do so many people worldwide suffer hunger and poverty when there is enough food and other resources globally to prevent it This book shows how famine and food insecurity are an essential part of modern capitalism Although trade debt relief and development initiatives are important they do not alter the structure of the global economy and poverty continues to be created by processes like privatisation trade liberalisation and market reform Despite the end poverty rhetoric of the World Bank and the G8 these high levels of poverty sustain Western wealth and power Is there any hope for change Using case studies from Egypt and North Africa Nigeria Sudan and elsewhere in sub Saharan Africa Ray Bush illustrates that there is resistance to neoliberal policies and that struggles over land mining and resources can shape real alternatives to existing globalisation

Health Sector Reforms in Orissa Subrata Kundu, 2010-07-12 In analysing the phenomenon of health sector reforms this book proposes a new conceptual framework of analysis and ethnography as a methodological tool which could be used effectively in various country contexts compared to what the existing theoretical frameworks do Thus apart from generating new knowledge in health sector this study has significance for policy makers across the world When the states themselves accept the fact that increasing private participation in health care in the form of health sector reforms is happening because of deliberate state policy they will be better positioned to take decisions which ensure effective private sector regulation and universal access to quality health care within a democratic or participatory framework of governance Increasing privatisation of health care has also led toward citizens losing their democratic spaces with regard to decisions on universal access to quality health care This has wider implications not only for improved health status in general but also about how we live in a modern society with our values of liberty equality and justice intact The book would be a useful guide for policy makers researchers students and layman across the world
