America In Theory:

America in Theory Leslie Berlowitz, Denis Donoghue, Louis Menand, 1988 The appeal to a shared sense of origins and national purpose is part of the rhetoric of American life Every new item on the social agenda from the New Deal to the Space Program to affirmative action has attempted to justify itself as an expression of American ideals But the historical source of the American experience is a matter of dispute was it the founding documents New England puritanism transcendentalism the sentiment of individualism the myth of America as a redeemer nation Indeed the whole idea of explaining our experience by a single impulse may itself be misconceived If so should we continue to justify public policy on these grounds Drawing together stimulating and original articles by such noted writers as McGeorge Bundy John Diggins E L Doctorow Denis Donoghue Gerald Holton and David Richards *America in Theory* examines the extent to which our perceptions of the past have dictated and should continue to dictate the way we address the problems of the present The essays consider general issues can we base public policy on an original intent of the Framers Is there an American way How do you reconcile the tension between a fixed tradition and a pluralistic nation How do our current concerns with theories of interpretation shape our reading of the constitution and a reconsideration of the past Norman Dorsen points out that many recent policy debates have reached an impasse because opposing forces base their arguments on contradictory interpretations of the American past And John Brademas former U S Representative and current President of New York University traces the history of federal support for education and offers a penetrating critique of Reagan s attempts to curtail this support In addition there are chapters on civil rights foreign policy the Equal Rights Amendment nuclear arms and affirmative action As these thought provoking essays reveal the myths and theories that make up our idea of America are still evolving are still open to debate two centuries after our nation s founding Anyone interested in the meaning of the American experience the recent direction of public policy both foreign and domestic and the future of America will find this volume provocative and insightful Space in America Klaus Benesch, Kerstin Schmidt, 2005 America s sense of space has always been tied to what Hayden White called the narrativization of real events If the awe inspiring manifestations of nature in America Niagara Falls Virginia s Natural Bridge the Grand Canyon etc were often used as a foil for projecting utopian visions and idealizations of the nation s exceptional place among the nations of the world the rapid technological progress and its concomitant appropriation of natural spaces served equally well as David Nye argues to promote the dominant cultural idiom of exploration and conquest From the beginning American attitudes towards space were thus utterly contradictory if not paradoxical a paradox that scholars tried to capture in such hybrid concepts as the middle landscape Leo Marx an engineered New Earth Cecelia Tichi or the technological sublime David Nye Not only was America s concept of space paradoxical it has always also been a contested terrain a site of continuous social and cultural conflict Many foundational issues in American history the dislocation of Native and African Americans the geo political implications of nation building immigration and transmigration

the increasing division and clustering of contemporary American society etc involve differing ideals and notions of space Quite literally space and its various ideological appropriations formed the arena where America's search for identity national political cultural has been staged If American democracy as Frederick Jackson Turner claimed is born of free land then its history may well be defined as the history of the fierce struggles to gain and maintain power over both the geographical social and political spaces of America and its concomitant narratives The number and range of topics interests and critical approaches of the essays gathered here open up exciting new avenues of inquiry into the tangled contentious relations of space in America Topics include Theories of Space Landscape Nature Technoscape Architecture Urban Utopia Literature Performance Film Visual Arts **The Pageant of America, a Pictorial History of the United States**, 1927

Americans Thinking America Charles Lemert, 2025-01-31 In this dynamic book Charles Lemert elaborates a vigorous distinctive and creative American tradition in social thought American social theory has tended to be overshadowed by European social thought Yet looking deeper Americans have always made important contributions to social theory Drawing upon the work of a dazzling array of both seminal and unjustly overlooked philosophers sociologists litterateurs and political activists Lemert constructs a coherent yet variegated intellectual framework for understanding American social theory and culture from the colonial era to the present In doing so Lemert analyses American intellectual attitudes on race gender popular culture political thought capitalism and social movements while also exploring schools of thought from transcendentalism and pragmatism to interactionism and intersectionality In his inimitable style Charles Lemert a master of finding theory where you'd least expect it offers a masterful rendering of the American tradition in social theory In doing so Lemert shines new light on social theory and American history Both authoritative and accessible this indispensable work will be essential reading for students scholars and general readers with interests in social theory and American social history
