America's Children and the Environment ,2003 America's children and the environment measures of contaminants, body burdens, and illnesses. Tracey J. Woodruff, Daniel A. Axelrad, Gregory G. Miller, Amy D. Kyle, Onyemaechi Nweke, 2003 Noting that children may be affected by environmental contaminants in ways quite different from the way adults are affected this report is the second on trends in measures reflecting environmental factors that may affect the U S children s health and well being A list of measures and key findings begins the report followed by five main sections Several measures throughout the report are analyzed by children s race ethnicity and family income Section 1 presents measures showing incidence of exposure to critical concentrations of contaminants in outdoor air indoor air water food and soil Section 2 presents measures of lead mercury and cotinine marker of environmental tobacco smoke exposure measured in the bodies of children and women Section 3 presents trends in asthma other severe respiratory illnesses childhood cancers and neurodevelopmental disorders such as attention deficit hyperactivity disorder and mental retardation Section 4 concerns the emerging issues of mercury in fish and attention deficit hyperactivity disorder Section 5 presents data specific to California and Minnesota The final section of the report discusses improvements in the measures and data sources and new measures for inclusion in future reports Major findings presented in the report include declines throughout the 1990s in the percentage of days with unhealthy air quality median blood lead levels for children under 5 and median blood levels of cotinine and overall increases in the percentage of children with asthma The frequency of new childhood cancer cases has been stable since 1990 Recent data indicate that 6 percent of children are diagnosed with mental retardation and 6 7 percent of children are diagnosed with attention deficit hyperactivity disorder State data revealed that 32 percent of California public elementary schools have deterioration of lead based paint and 47 percent of Minnesota schools sprayed pesticides in classrooms A glossary of terms completes the report Four appendices include data tables and a list of environmental health objectives in the Energy Protection Agency s strategic plan Each report section contains references KB **America's Children and the Environment** ,2000 Presents concrete quantifiable measures for key factors relevant to the environment and children in the United States and provides a starting point for discussions among policymakers and the public about how to improve federal data on children and the environment **America's Children and the Environment** ,2000 *EPA 240-R. ,*

Encyclopedia of Environmental Health ,2008-09-01 Environmental health has evolved over time into a complex multidisciplinary field Many of the key determinants and solutions to environmental health problems lie outside the direct realm of health and are strongly dependent on environmental changes water and sanitation industrial development education employment trade tourism agriculture urbanization energy housing and national security Environmental risks vulnerability and variability manifest themselves in different ways and at different time scales While there are shared global and transnational problems each community country or region faces its own unique environmental health problems the solution

of which depends on circumstances surrounding the resources customs institutions values and environmental vulnerability This work contains critical reviews and assessments of environmental health practices and research that have worked in places and thus can guide programs and economic development in other countries or regions The Encyclopedia of Environmental Health Five Volume Set seeks to conceptualize the subject more clearly to describe the best available scientific methods that can be used in characterizing and managing environmental health risks to extend the field of environmental health through new theoretical perspectives and heightened appreciation of social economic and political contexts and to encourage a richer analysis in the field through examples of diverse experiences in dealing with the health environment interface The Encyclopedia of Environmental Health contains numerous examples of policy options and environmental health practices that have worked and thus can guide programs in other countries or regions It includes a wide range of tools and strategies that can assist communities and countries in assessing environmental health conditions monitoring progress of intervention implementation and evaluating outcomes Provides a comprehensive overview of existing knowledge in this emerging field Articles contain summaries and assessments of environmental health practices and research providing a framework for further research Places environmental health in the broader context of environmental change and related ecological political economic social and cultural issues

Children's Health, the Nation's Wealth Institute of Medicine, National Research Council, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Evaluation of Children's Health, 2004-10-18 Children's health has clearly improved over the past several decades Significant and positive gains have been made in lowering rates of infant mortality and morbidity from infectious diseases and accidental causes improved access to health care and reduction in the effects of environmental contaminants such as lead Yet major questions still remain about how to assess the status of children's health what factors should be monitored and the appropriate measurement tools that should be used

Children's Health the Nation's Wealth Assessing and Improving Child Health provides a detailed examination of the information about children's health that is needed to help policy makers and program providers at the federal state and local levels In order to improve children's health and thus the health of future generations it is critical to have data that can be used to assess both current conditions and possible future threats to children's health This compelling book describes what is known about the health of children and what is needed to expand the knowledge By strategically improving the health of children we ensure healthier future generations to come

Public Health and the Environment, 2002 **The California Environmental Protection Agency's Children's Environmental Health Program Biennial Report** California Environmental Protection Agency. Children's Environmental Health Center, 2000 **America's Babies** Cindy Oser, Julie Cohen, 2003 A unique reference book that presents information on the state of infants and toddlers up to 3 years of age in the United States Detailed statistics research and compelling data combine to help readers understand how biological environmental and family conditions

interact to influence lifetime development Among the areas addressed are demographics quality of child health and well being in the U S family and economic factors state of early education and child care effects of violence and trauma and how the U S compares to other countries It includes more than 70 figures and tables *Long Term Trends in the Well-being of Children and Youth* Roger P. Weissberg,2003 A large body of research provides a detailed picture of many aspects of the lives of children and youth today If we are to develop and strengthen our knowledge and target resources effectively however we need a better understanding of how child and youth well being has changed over the last century The authors have adopted an ambitious long term perspective and looked back over much of the last century to examine changes in the wide variety of domains that together add up to the complex picture of our children s overall well being including educational attainment drug use sexual behavior health family composition and supports economic security child care government policies and programs media and communities The authors consider the implications of the data and discuss the adequacy of current policies and programs for young people in light of the documented trends

Children's Environmental Health,2002

Economic Valuation of Environmental Health Risks to Children Organisation for Economic Co-operation and Development,2006-02-03 The relationship between environment and children s health has been the subject of increasing interest these last ten years For instance many OECD Member countries are reporting asthma epidemics exacerbated by air pollution in the United States nearly 1 in 13 school age children approximately 4 8 million has asthma and the rate is increasing more rapidly in school age children than in any other group The importance of this issue has resulted in a growing number of epidemiological studies aiming at better understanding and better characterising the relationship between environmental pollution and the health of children However in many respects the valuation of children s health strongly differs from the valuation of adults health and constitutes a real challenge for analysts as well as for decision makers Consequently this book proposes an in depth analysis of the main methodological difficulties associated with estimating the social value of a reduction in risk to children Questions such as how to elicit children s preferences what valuation methodology and benefit measure to choose how to discount benefits to children s health and how to account for economic uncertainties in this specific context of economic valuation will be systematically examined in order to define key policy implications and to pave the way for further research
