AI in Museums Sonja Thiel, Johannes C. Bernhardt, 2023-12-04

Artificial intelligence is becoming an increasingly important topic in the cultural sector. While museums have long focused on building digital object databases, the existing data can now become a field of application for machine learning, deep learning, and foundation model approaches. This goes hand in hand with new artistic practices: curation tools, visitor analytics, chatbots, automatic translations, and tailor-made text generation. With a decidedly interdisciplinary approach, the volume brings together a wide range of critical reflections, practical perspectives, and concrete applications of artificial intelligence in museums and provides an overview of the current state of the debate.
