**The Ancestor's Tale** Richard Dawkins,2004 Renowned biologist and thinker Dawkins presents his most expansive work yet a comprehensive look at evolution ranging from the latest developments to his own provocative views and loosely based on the form of Chaucer s Canterbury Tales [The Ancestor's Tale](#) Richard Dawkins,Yan Wong,2016-04-28 A fully updated edition of one of the most original accounts of evolution ever written featuring new fractal diagrams six new tales and the latest scientific developments THE ANCESTOR S TALE is a dazzling four billion year pilgrimage to the origins of life Richard Dawkins and Yan Wong take us on an exhilarating reverse journey through evolution from present day humans back to the microbial beginnings of life It is a journey happily interrupted by meetings of fellow modern animals as well as plants fungi and bacteria similarly tracing their evolutionary path back through history As each evolutionary pilgrim tells their tale Dawkins and Wong shed light on topics such as speciation sexual selection and extinction Written with unparalleled wit clarity and intelligence taking in new scientific discoveries of the past decade and including new tales illustrations and fractal diagrams THE ANCESTOR S TALE shows us how remarkable we are how astonishing our history and how intimate our relationship with the rest of the living world [The Ancestor's Tale](#) Richard Dawkins,2004 THE DAWN OF EVOLUTION

Jenner,2022-07-28 Exploration of the history and current practice of phylogenetics as a storytelling discipline that provides explanations for character evolution *Consecrating Science* Lisa H. Sideris,2017-08-15 In *Consecrating Science* Lisa Sideris offers a searing critique of The New Cosmology a complex network of overlapping movements that claim to bring together science and spirituality all in the name of saving our planet from impending ecological collapse Highly regarded in many academic circles these movements have been endorsed by numerous prominent scholars scientists historians and educators Their express goal popularized in numerous books films TED talks YouTube videos podcasts and even introductory courses at places like Harvard or Washington University is to instill in readers and audiences a profound sense of being at home in the universe thereby fostering environmentally responsible behavior Whether promoted as The New Story The Universe Story or The Epic of Evolution they all offer humanity a new sacred story a common creation myth for modern times and for all people the evolutionary unfolding of the universe from the Big Bang to the present Evolutionary science and religious cosmology together at last But as Sideris shows however the New Cosmology actually underwrites a staggeringly anthropocentric vision of the world Instead of cultivating an ethic of respect for nature the project of consecrating science only increases human arrogance and indifference to nonhuman life Going back to the work of Rachel Carson and other naturalists the author shows how a sense of wonder rooted in the natural world and our own ethical impulses helps foster environmental attitudes and policies that protect our planet Provided by publishe
