A New Jewish Theology In The Making:

A New Jewish Theology in the Making Eugene B. Borowitz, 1968 *The Cambridge Companion to American Judaism* Dana Evan Kaplan, 2005-08-08 This volume provides readers with a comprehensive introduction to the most important and interesting historical and contemporary facets of Judaism in America. Written by twenty-four leading scholars from the fields of religious studies, American history and literature, philosophy, art history, sociology, and musicology, the book adopts an inclusive perspective on Jewish religious experience. Three initial chapters cover the development of Judaism in America from 1654 when Sephardic Jews first landed in New Amsterdam until today. Subsequent chapters include cutting-edge scholarship and original ideas while remaining accessible at an introductory level. A secondary goal of this volume is to help its readers better understand the more abstract term of religion in a Jewish context. *The Cambridge Companion to American Judaism* will be of interest not only to scholars but also to all readers interested in social and intellectual trends in the modern world.

Dictionary of Modern American Philosophers John R. Shook, 2005-01-01 *The Dictionary of Modern American Philosophers* includes both academic and non-academic philosophers and a large number of female and minority thinkers whose work has been neglected. It includes those intellectuals involved in the development of psychology, pedagogy, sociology, anthropology, education, theology, political science, and several other fields before these disciplines came to be considered distinct from philosophy in the late nineteenth century. Each entry contains a short biography of the writer, an exposition and analysis of his or her doctrines and ideas, a bibliography of writings, and suggestions for further reading. While all the major post-Civil War philosophers are present, the most valuable feature of this dictionary is its coverage of a huge range of less well-known writers, including hundreds of presently obscure thinkers. In many cases, *The Dictionary of Modern American Philosophers* offers the first scholarly treatment of the life and work of certain writers. This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought. [Journal of](#)

Samuelson, 2012-02-01 The book is divided into three sections. The first provides a general historical overview for the Jewish thought that follows. The second summarizes the variety of basic kinds of popular, positive Jewish commitment in the twentieth century. The third and major section summarizes the basic thought of those modern Jewish philosophers whose thought is technically the best and/or the most influential in Jewish intellectual circles. The Jewish philosophers covered include Spinoza, Mendelssohn, Hermann Cohen, Martin Buber, Franz Rosenzweig, Mordecai Kaplan, and Emil Fackenheim. The text includes summaries and a selected bibliography of primary and secondary sources. *The New American Cyclopaedia* Charles Anderson Dana, George Ripley, 1873 **Jewish Spirituality: From the sixteenth-century revival to the present** Arthur Green, 1986 Library has
