The Transition Handbook Rob

Hopkins,2008-02-25 Move from feeling anxious about the oil crisis to developing a positive visions and taking traction action to create a more self reliant existence with this ground breaking book We live in an oil dependent world and have become reliant in a very short space of time using vast reserves of oil in the process and without planning for when the supply is not so plentiful Most of us avoid thinking about what happens when the oil runs out or becomes prohibitively expensive but the reality may not be as bad as we think The Transition Handbook shows how the inevitable and profound changes ahead could have a positive effect Written by permaculture expert Rob Hopkins he discusses the possibility of a rebirth of local communities which will generate their own fuel food and housing These will encourage the development of local currencies to keep money in the local area and unleash a local skilling up so that people have more control over their lives The growth in interest in the Transition model continues to be exponential There are now more than 35 formal Transition Initiatives in the UK including towns cities islands villages and peninsulas with more joining as the idea takes off With little proactivity at government level communities are taking matters into their own hands and acting locally If your community has not yet become a Transition Initiative this upbeat guide filled with beautiful black and white photographs offers you the tools to get started The Transition Handbook is the perfect manual to guide communities as they begin this energy descent journey

Evolutionary Theory and Processes: Modern Horizons Solomon P. Wasser,2013-03-09 Evolution is the most profound of human ideas integrating all natural phenomena cosmic biological and cultural into a continuous universal change This volume deals with evolutionary observations experiments and theories contributing to a deeper understanding of the evolutionary process th honoring the 75 birthday of Eviatar Eibi Nevo I first met Eibi in 1966 when he was a Fellow in the Museum of Comparative Zoology at Harvard University and working mostly on cricket frog vocalization and speciation in the United States His unique discovery of pipid fossil frogs in the Israeli Early Cretaceous central Negev is possibly the largest

world collection of ancient fossil frogs Our acquaintance developed into mutual friendship and admiration Since then our long lasting friendship has included a visit to Israel enabling me to follow Eibi s major scientific achievements in particular his founding of the Institute of Evolution in the University of Haifa and now the pending establishment of the International Graduate School of Evolution The research program of Eibi Nevo in collaboration with numerous colleagues and students in Israel and across the world encompasses diverse perspectives of evolutionary biology and biodiversity of genes populations species and ecosystems integrating modern and classical evolutionary approaches molecular and organismal They deal with model organisms in all forms from bacteria through plants fungi animals and humans conducted over local regional and global scales

Getting to the Better Future John E. Renesch,2001 Renesch puts forth a vision for historic transformation for all humankind as he pictures a global future full of possibilities a much better future than the one that appears most likely if we rely upon forecasts based on existing trends Not only that the author points directly to the business community as the segment of our society that can best lead the rest of the world in such an incredible transition for all humanity

You Can Change the World Ervin Laszlo,2003 You Can Change the World The Global Citizen s Handbook for Living on Planet Earth should be required reading for anyone who cares about the future of the planet Written by renowned scientist futurist and Club of Budapest founder Ervin Laszlo You Can Change the World answers two pertinent questions first what is at the root of all the conflict and crisis in today s world And second what can actually be done to move toward a world where we can live in peace without marginalizing and killing each other and destroying the environment A handbook that urges readers to become global citizens who aspire to live responsibly on this precious but highly exploited and crisis prone planet You Can

Change the World provides a simple and basic message in today's world it is neither wealth nor power nor the control of territory and technology that make the crucial difference How we think and act shapes our present and decides our future

Perspectives on Science and Christian Faith, 1998 *The Choice* Ervin Laszlo, 1994 In the closing years of the twentieth century many scientists politicians economists and journalists are pointing out the inevitable dangers of humanity's current trajectory and calling our world culture unsustainable But most of their visions of doom are based on a single area of expertise pollution population deforestation energy depletion or various other threats from unbridled technology They do not reflect the big picture which may be far less bleak than they propose Ervin Laszlo a long standing member of the Club of Rome and an internationally renowned expert on global trends sees opportunities even amid the dark news With a background in science economics philosophy and art he ties diverse issues into a grand vision he calls the Fifth Wave the complex interaction of trends that has led us to unprecedented global stress By exploring the underlying causes of the Fifth Wave readers will gain a deeper perspective on daily headlines and a new hope for alternative directions for humanity Dr Laszlo describes the era in which we live as the Grand Transition a time when classical assumptions have collapsed The world is much more complex and the problems that surround us more difficult to understand let alone solve than ever before But he says if we alter our perceptions of environmental colonial and social issues we can still intervene successfully to resolve crucial global crises Dr Laszlo gives specific recommendations for this renewed perception in the areas of education communication and information gathering to help us navigate the turbulent waters of the twenty first century And most important he shares signs of hope for the future value changes in society a green trend in politics shifts in corporate culture a paradigm shift in science and the reinvigoration of spiritual life are all contributing to our ultimate evolution not extinction Caught between fruitless despair and seemingly naive hope thinking people throughout the world need an authoritative voice to offer guidance that points the way to real evolutionary change In *The Choice* Ervin Laszlo offers such a vision
