The Darker Side of Travel Richard Sharpley, Philip R. Stone, 2009-08-25 Over the last decade the concept of dark tourism has attracted growing academic interest and media attention Nevertheless perspectives on and understanding of dark tourism remain varied and theoretically fragile whilst to date no single book has attempted to draw together the conceptual themes and debates surrounding dark tourism to explore it within wider disciplinary contexts and to establish a more informed relationship between the theory and practice of dark tourism This book meets the undoubted need for such a volume by providing a contemporary and comprehensive analysis of dark tourism *Forensic Approaches to Death, Disaster and Abuse* Marc Oxenham, 2008 During the last 100 years infant mortality rates have improved dramatically yet even in a developed country such as Australia the physical health of infants varies greatly despite advances in science and technology It has now become clear that emotional and physical development is affected by many different variables Not only must physical development and health support be adequate but the presence of factors such as good enough parenting and the absence of others such as substance abuse and domestic violence are now becoming better understood So how best to work with families where infants are at risk This is the substance of this book to understand how to achieve improved outcomes for infants growing up in situations of risk mainly in the area of the parents mental health but also in other related psychosocial circumstances that may impair parental functioning These include migration substance abuse and infant hospitalisation Throughout this book the authors examine the effects of adverse life circumstances on infant and family and in most cases also describe assessments and interventions Several chapters have been written by people personally affected by mental illness or mental illness of a family member This provides in depth and often poignant understanding of the perspective of those living with the effects of such illnesses and helps to expand our knowledge and skills to work with at risk families
