Armourer And His Craft:

The Armourer and His Craft from the XIth to the XVIth Century Charles John Ffoulkes, 1988 **The Armourer and His Craft from the XIth to the XVIth Century, by Charles Ffoulkes,...** Charles Ffoulkes, 1912 **The Armourer and His Craft** Charles John Ffoulkes, 2008-12-01

As soon as the armed man realized that iron and steel were the best defences for his body he would naturally insist that some sort of a guarantee should be given him of the efficacy of the goods supplied by his armourer. This system of proving armour would be effected by using those weapons commonly in use and these in the early times were the sword, the axe, the lance, the bow and the crossbow. The latter seems to have been the more common forms of proof, though as late as the seventeenth century we have evidence that armour was proved with the estremaon or sword blow from The Proof of Armour. Not a history of defensive armor but rather a guide to the actual making of armor as well as the regulations that governed the artisans who made it, this is a fascinating and practical handbook on the production, selling and wearing of metal traditional medieval body armor. First published in 1912, this classic book by British historian and author CHARLES JOHN FFOULKES (1868-1947), curator of London's Royal Armouries, draws on records of the time to detail the tools and appliances of the trade, the decoration and cleaning of armor, the use of leather and fabrics, and much more, to offer a complete reference for readers of period fiction and history, wargamers, costumers, and anyone fascinated by the craft of the armorer. This replica of the 1912 edition is complete with all of the original diagrams, illustrations, and photos.

The Armourer and His Craft Charles Ffoulkes, 1967 *The armourer and his craft from the XIth to the XVIth century* Charles John Ffoulkes, 2021-11-05

In *The Armourer and His Craft from the XIth to the XVIth Century*, Charles John Ffoulkes meticulously explores the intricate evolution of armory during a pivotal era in European history. This scholarly work combines detailed historical insight with astute observations on the technological advancements and artistic expressions of the craft. Ffoulkes employs a clear and engaging literary style, drawing on a rich compilation of primary sources, including manuscripts and visual artifacts, to reconstruct the lived realities of armorers who shaped both warfare and societal status from the medieval to the early modern period. Charles John Ffoulkes, an esteemed scholar and expert in military history, embarked on this in-depth study motivated by an enduring fascination with the interplay between arms and society. His extensive background in archaeology and history, coupled with hands-on experience in armoring techniques, provided him with a unique perspective that informs his analysis. Ffoulkes's work stands as a significant contribution to the understanding of craftsmanship, technology, and cultural evolution within the context of armory. This book is an essential read for historians, students, and enthusiasts of military history and craftsmanship. By illuminating the artistry and engineering behind medieval armory, Ffoulkes invites readers to appreciate not just the weapons themselves but the skilled artisans whose craft shaped their creation.
