Army And Aviation:

A History of Army Aviation, 1950-1962 Richard P. Weinert, 1991 **A History of Army Aviation** James W. Jr. Williams, James Williams, James W. Williams, 2005-09 spellbinding history the how what when where and why some never told and certainly not always understood This is a story that has begged to be told with sources and substance heretofore missing Historians military scholars and aviators will rely on this work for years Carl H McNair Jr Major General U S Army Retired This is worth a good read a welcome and long overdue history of Army Aviation Joseph L Galloway senior military correspondent Knight Ridder Newspapers and co author *We Were Soldiers Once and Young Soldiers* scholars and aviation enthusiasts alike can learn much from this comprehensive examination successfully blends lively and insightful historical narrative with astute analysis unfailingly honest assessment of contributions to our national defense Carol Reardon Pennsylvania State University author of *LAUNCH THE INTRUDERS* tightly written and focused traces the aviation branch from its inception through two world wars the loss of a major portion to the new Air Force up through its current role required reading for anyone who desires to understand Army aviation Darrel Whitcomb author of *The Rescue of Bat 21* and *Combat Search and Rescue in Desert Storm* tells the whole story concisely by addressing seven key themes crisp prose and well chosen illustrations This old ground pounder owes his life to brave crews of Army birds Henry Gole Ph D Colonel ret author of *Soldiering* **A History of Army Aviation 1950-1962** Richard P. Weinert, Susan Canedy, Army Training & Doctrine Command, 2011 U S Army aviation expanded dramatically in both size and breadth of activities after its inception in 1942 but much of its post World War II history particularly after the establishment of the Air Force as an independent service by the national Security Act of 1947 has been relatively neglected Despite a certain amount of jockeying for position by both services particularly in the early years after their separation the Army was able to carve out a clear transport and operational combat role for its own air arm *A History of Army Aviation 1950 1962* examines the development of the Army s air wing especially for air support of ground troops both in terms of organization and in relation to the ongoing friction with the Air Force After describing the rapid expansion of purely Army air power after 1950 and the accompanying expansion of aviation training the book delves into the reorganization of aviation activities within a Directorate of Army Aviation It also provides a valuable account of the successful development of aircraft armament perhaps the most significant advance of this period In particular intensive experimentation at the Army Aviation School led to several practical weapons systems and helped to prove that weapons could be fired from rotary aircraft This arming of the helicopter was to have a profound effect on both Army organization and combat doctrine culminating in official approval of the armed helicopter by the Department of the Army in 1960 *A History of Army Aviation 1950 1962* also explores the development of new aircraft between 1955 and 1962 including the UH 1 medical evacuation transport and gunship helicopter and the HC 1 cargo copter In addition the book discusses the Berlin Crisis of 1961 as an impetus for immediate and unexpected expansion of army aviation quickly followed

by the beginnings of intervention in Vietnam by the end of 1962

With Wings as Eagles Cecil B. Currey,1984

Air Army Aviation and Unified Land Operations U S Army Command and General Staff Coll,U. S. Army U.S. Army Command and Staff College,2014-08-13

Much has changed in the U S Army over the last decade Transforming to a modular brigade centric force included a transition of operating concepts as well Just as ground maneuver brigades transformed to be more versatile adaptable agile deployable and tailorable so too did Army Aviation The Combat Aviation Brigade embodies many of the lessons learned yet represents many of the same mistakes made throughout the history of Army Aviation As with previous periods in Army Aviation s history the Aviation Branch remains disconnected from the rest of the Army s transformation To optimize for the new operating concept of Unified Land Operations Aviation Branch must redefine the role and renew the doctrine of Army Aviation in the execution of Decisive Action Unified Land Operations requires flexibility adaptability integration and a depth that will require a return to centralized maneuver focused brigade operations and an end to the current operational trends of CABs Lastly Army Aviation must assess the current force structure evolution to ensure it truly enables Army Aviation s total contributions to Combined Arms Maneuver CAM and Wide Area Security WAS and the ability to conduct the offensive defensive and stability or Defense Support to Civil Authority DSCA operations

Wingless Eagle Herbert A. Johnson,2003-04-03

At the start of the twentieth century the United States led the world in advances in aviation with the first successful engine powered flights at Kitty Hawk North Carolina and Dayton Ohio beginning in 1903 Fifteen years later however American airmen flew European designed aircraft because American planes were woefully inadequate for service on the Western Front Why was the United States so poorly prepared to engage in aerial combat in World War I To answer this question Herbert Johnson takes a hard look at the early years of U S military aviation exploring the cultural technical political and organizational factors that stunted its evolution Among the recurring themes of Johnson s narrative are the damaging effects of a chronic lack of governmental funding for military aeronautics and the disruptive influence of a civilian aeronaut constituency both on military discipline and on public and Congressional attitudes toward army aviation In addition the Wright brothers patent litigation hindered the technical development of American aircraft and crippled the domestic aviation industry s manufacturing capacity Wartime experience helped correct some of these problems but the persistence of others left the postwar Air Service with an uncertain and stormy future

Eyes of Artillery Edgar F. Raines,2000 CMH Pub 70 31 Army Historical Series Examines the institutional origins of modern Army Aviation by recounting the experiences of the men who flew observed fire missions or Air Observations Posts AOP in light aircraftfor the Field Artillery during World War 2 Identifies the circumstances and debate that gave rise to the AOP program

The Politics of Air Power Rondall Ravon Rice,2004-01-01 Forfatteren

analyserer den turbulente udvikling af relationerne imellem Ledelsen af US Army Aviation og politikerne i 1920 1930 hvor Brigadegeneral William Billy Mitchel an en gruppe af Army Air Service Officer fors gte at skabe et uafh ngigt flyvev ben imod pr sidentens nske

Eyes of Artillery Edgar F. Raines,2002-08-01 Warfare has had its third dimension air for so long that no soldier or airman now serving has a personal memory of the expectations adaptations or debate that accompanied its early years Air enthusiasts often appear to forget that the most effective applications of air power have been in concert with ground forces Indeed for three wars running World War II Korea and Vietnam the close support technique of choice featured airborne eyes and ground artillery This volume examines the institutional origins of modern Army Aviation by recounting the experiences of the men who flew observed fire missions in light aircraft for the Field Artillery during World War II The War Department designated these aircraft air observation posts but the ground troops they supported affectionately referred to them by such names as Maytag Messerschmidts and biscuit bombers instead Aircraft served as a key component of the Field Artillery indirect fire system and also played a crucial role in the command and control of armored divisions during mobile operations The author takes care to delineate how air observation posts interacted with each element of the combined arms team Eyes of Artillery identifies the circumstances and debate that gave rise to the Air Observation Post Program The development of military aviation generated an extended struggle within the Army for the control of aerial observation and posed related questions concerning how air and ground elements should interact with one another The author gives primary emphasis to the period from January 1939 when the Field Artillery began to actively seek control of its own observation aircraft until September 1945 when Japan surrendered and the War Department prepared to expand the organic light aircraft program to the other ground combat arms Many of the traditions concepts and disputes that still characterize Army Aviation originated during these critical years Eyes of Artillery is the first archive based in depth study of the origins of modern Army Aviation in the United States It makes a genuine and unique contribution to the literature of World War II and to the institutional history of the Army John S BrownBrigadier General United States ArmyChief of Military History

Annual Command History U.S. Army Aviation and Troop Command,1995

Army Aviation and Air Combat Danny C. Cox,Richard N. Roy,AIR WAR COLL MAXWELL AFB AL.,1988 Examines form both a historical and doctrinal perspective the use of Army Aviation resource to fight in an air to air combat role A description of the threat describes Soviet helicopter design initiatives and provides an insight as to how the Soviets envision employing helicopters in an air combat role A historical review of Army Aviation s development details how aviation has been integrated into the Army s combined arms team dedicated to winning the ground war The use of Army assets in counterair operations is mandated by joint doctrine and the Army is responsible for developing a capability to implement that doctrine The Army s air defense doctrine incorporates the concept of combined arms and Army Aviation has the ability to contribute as a integral member of the combined arms team This paper acknowledges that the Army s counterair mission is doctrinally legitimate however the suggestion is made

that the use of Army aircraft in an air combat role is a revolutionary departure from the historical evolution of Army Aviation
