Army And The New National Security Strategy:

The U.S. Army and the New National Security Strategy, 2003 The Army asked the RAND Arroyo Center in fall 2001 to look at the implications for the Army of the new national security strategy This was exactly the right question given the remarkable changes that are occurring in the world in terms of both advances in technologies and how the strategic environment is evolving What we decided was to draw together a group of RAND researchers who have been working over the past few years on a variety of issues for the Army and use their research as a springboard for answering this question The result is the chapters in this volume which span the broad range of subjects that will be on the Army's future agenda strategic operational programmatic and budgetary Each of the authors describes his or her view of the most critical issues facing the Army and then what the Army needs to do The substantive analysis in this report was completed in February 2003 as the international community was still debating its future policies toward Iraq what happens in Iraq will almost certainly add to the complexity of the strategic environment in which the U S Army will operate and could well bring more urgency to the changes that the authors of this report call on the Army to undertake Taken as a whole the report provides the Army with a perspective on its ongoing transformation and where it needs refinement In this way the report aims to engage the broader defense community in the debate over which forces and capabilities the Army needs to be able to serve the nation in the future as well as it has in the past The report should be of interest to anyone concerned about the future of the U S military in general and the U S Army in particular

Our New National Security Strategy James J. Tritten, 1992-09-30 This book is an analysis of President Bush's Regional Defense Strategy first unveiled in Aspen Colorado on August 2 1990 This strategy involves a mix of active reserve and reconstitutable forces and General Colin Powell's Base Force If implemented the new strategy and force structure would return significant U S ground and air forces to the continental United States where most would be demobilized In the event of a major crisis the United States would rely on active and reserve forces for a contingency response much as was done for Operation Desert Storm The new national security strategy is based upon the 25 percent budget cut negotiated with Congress a greatly depleted Russian threat and a new international security environment that assumes two years warning of a European centered global war with the former USSR There are four major critical factors upon which the new strategy depends 1 the continued decline of the Russians as a threat to world stability 2 the ability of the

intelligence community to meet new challenges 3 the behavior of the allies and Congress and 4 the ability of industry to meet new demands The new strategy is not simply an adjustment to existing defense doctrine or strategy but rather a fundamental revision of the way the United States has approached defense since 1945 Students and scholars interested in politico military strategy and government policy will find this book of great interest [The Army and the New National Security Strategy](#) ,2003 **The Army and the New National Security Strategy** ,2003 [Hungary Army, National Security and Defense Policy Handbook Volume 1 Strategic Information and Developments](#) IBP.
