*Revisualizing Visual Culture* Chris Bailey,Hazel Gardiner,2016-04-08 In the past twenty years digital technology has had a radical impact on all the disciplines associated with the visual arts this book provides expert views of that impact By looking at the advanced ICT methods now being employed this volume details the long lasting effects and advances now made possible in art history and its associated disciplines The authors analyze the most advanced and significant tools and technologies from the ongoing development of the Semantic Web to 3D visualization focusing on the study of art in the various contexts of cultural heritage collections digital repositories and archives They also evaluate the impact of advanced ICT methods from technical methodological and philosophical perspectives projecting supported theories for the future of scholarship in this field The book not only charts the developments that have taken place until now but also indicates which advanced methods promise most for the future *Radical Atoms and the Alchemists of Our Time* Gerfried Stocker,Christine Schöpf,Hannes Leopoldseder,2016 Ars Electronica has been accompanying and analyzing the digital revolution and its manifold implications since 1979 It has consistently focused and focuses on processes and trends at the interface between art technology and society This artistic scientific research becomes visible in the form of a festival that is organized every year in Linz Austria Its five day program comprises conferences panel discussions workshops exhibitions performances interventions and concerts The event is planned organized and produced in collaboration with international artists and scientists Each festival addresses a different volatile future issue This year it is the Radical Atoms and the Alchemists of the Future The volume uses images and texts to sketch this year s edition of the Ars Electronica Festival Ars Electronica Festival Linz 8 12 9 2016 The Johns Hopkins Guide to Digital Media Marie-Laure Ryan,Lori Emerson,Benjamin J. Robertson,2014-04-15 The first systematic comprehensive reference covering the ideas genres and concepts behind digital media The study of what is collectively labeled New Media the cultural and artistic practices made possible by digital technology has become one of the most vibrant areas of scholarly activity and is rapidly turning into an established academic field with many universities now offering it as a major The Johns Hopkins Guide to Digital Media is the first comprehensive reference work to which teachers students and the curious can quickly turn for reliable information on the key terms and concepts of the field The contributors

present entries on nearly 150 ideas genres and theoretical concepts that have allowed digital media to produce some of the most innovative intellectual artistic and social practices of our time The result is an easy to consult reference for digital media scholars or anyone wishing to become familiar with this fast developing field Code Andrea Gleiniger,Georg Vrachliotis,2012-12-13 The process of coding is a systematic experimentation with signs symbols and the construction of larger cultural meanings The fourth volume in the series Kontext Architektur examines the architectural historical and theoretical relevance of the concept of code from various perspectives The authors and editors start from the premise that this concept makes for new ways of translating architecture into language Thus the dominance of computer simulation makes it clear that the building is no longer merely a vehicle for signs but literally also their product The code has penetrated as it were from the exterior of the building into its interior into its structure We are dealing with both a socio cultural as well as with a mathematical and formal notion of code The goal of this book is thus to arrive at a critical grasp of the contours of this vibrant conceptual tension between the cultural and the formal the outside and the inside while also formulating questions for further exploration that are relevant for architecture **Ubermorgen.com** Hans Bernhard,Lizvlx,2009 **Culture as Capital** Slavko Kacunko,2015-03-02 By following and reproducing the cultural turn the rhetoric of cultural mix and hybridism is disseminated today primarily in its crossing of trade barriers Cultures reduced to their exchange value function as capital an accumulative speculative and ultimately financial affair In some of its media and site un specific manifestations process art which aims to encompass both old and new media art seems to resist this pressure despite nonetheless not being protected from regulations and incorporations In the present collection of his recent essays Slavko Kacunko discusses the process art by crossing the disciplines of art history and comparative media visual and cultural studies As a first approximation several historiographical remarks on closed circuit video installations underline their importance as a core category of process art In the second part the problems of process art seen as a threshold of art history are further examined in another retroanalytical step in which concepts and objects related to mirror frame and immediacy are analyzed as the triple delimitation of visual culture studies In the third part previously outlined manifestations of what is termed the post visual condition are summarized and projected to the coreless core of the emerging art and research related to the coreless beings par excellence the bacteria *Ars Electronica 2006* Gerfried Stocker,Christine Schöpf,2006 Isn t it strange that we are constantly developing new technologies to simplify our lives and work but in the end we are left with the impression that everything s just become a lot more complicated Simplicity more than just the pipe dream of a society dominated by technical revolutions global networks and inundations of information No other concept of late has enjoyed such widespread popularity and so accurately expressed the needs of our times Just how are we to cope with the increasing degree of complexity in the reality we inhabit How can we tap and utilize the potential of global communication in an efficient and responsible way How can we develop systems devices and programs that are responsive to our strengths and intuitive capabilities The Ars

Electronica 2006 catalog brings together the theoretical reflections of participating artists and elaborations on projects presented at the Ars Electronica Festival 2006 thus providing a dynamic overview of the entire range of facets and levels of significance of the festival theme Simplicity the art of complexity Simplicity is not the opposite of complexity it is its complementary key Book jacket **Learning from the Past, a Foundation for the Future** Bob Martens, André Brown, 2005 Cyberarts, Cybercultures, Cybersocieties Grzegorz Sztabiński, 2003 *Leonardo*, 2004 International journal of contemporary visual artists **Sexing Code** Claudia Herbst, 2008 Critically investigating the gender of programming in popular culture Sexing Code proposes that the de facto representation of technical ability serves to perpetuate the age old association of the male with intellect and reason while identifying the female with the body Challenging this division in which code is situated within the male sphere the discussion highlights women's contributions in the writing and theorizing of code particularly in the digital arts hacking and hacktivism Presenting an accessible and lively discussion Sexing Code demonstrates that the gendering of programming selectively confers the privilege of authorship and is therefore a salient factor in the production of culture in the twenty first century **Readme** Olga Goriunova, Alexei Shulgin, Aarhus universitet.
