Valuing Landscape in Classical Antiquity , 2016-05-18 Where am I Our physical orientation in place is one of the defining characteristics of our embodied existence However while there is no human life culture or action without a specific location functioning as its setting people go much further than this bare fact in attributing meaning and value to their physical environment Landscape denotes this symbolic conception and use of terrain It is a creation of human culture In Valuing Landscape we explore different ways in which physical environments impacted on the cultural imagination of Greco Roman Antiquity In seventeen chapters with different disciplinary perspectives we demonstrate the values attached to mountains the underworld sacred landscapes and battlefields and the evaluations of locale connected with migration exile and travel Of Rocks and Water Ömür Harmanşah, 2014-07-11 People are drawn to places where geology performs its miracles ice cold spring waters gushing from the rock mysterious caves which act as conduits for ancestors and divinities traveling back and forth to the underworld sacred bodies of water where communities make libations and offer sacrifices This volume presents a series of archaeological landscapes from the Iranian highlands to the Anatolian Plateau and from the Mediterranean borderlands to Mesoamerica Contributors all have a deep interest in the making and the long term history of unorthodox places of human interaction with the mineral world specifically the landscapes of rocks and water Working with rock reliefs sacred springs and lakes caves cairns ruins and other meaningful places they draw attention to the need for a rigorous field methodology and theoretical framework for working with such special places At a time when network models urban centered and macro scale perspectives dominate discussions of ancient landscapes this unusual volume takes us to remote unmappable places of cultural practice social imagination and political appropriation It offers not only a diverse set of case studies approaching small meaningful places in their special geological grounding but also suggests new methodologies and interpretive approaches to understand places and the processes of place making Stonehenge Landscapes Sally Exon, Vincent L. Gaffney, Ann Woodward, Ron Yorston, 2000 Stonehenge Landscapes is the largest digital analysis of the archaeological landscape and monuments of Stonehenge ever attempted The study uses data from more than 1200 monuments The contents of the Stonehenge barrows are collated for the first time and presented in a series of appendices

The result of this endeavour is a major phenomenological study of the development of the Stonehenge landscape from the Mesolithic to the Early Bronze Age. The authors explain how the landscape emerged over time, the developing relationships between the public monuments and how these monuments created new spaces for social action in prehistory. The way monuments were used and perceived is discussed, and the results are demonstrated through interactive software which displays GIS data, animations of movement along monuments and through the landscape, as well as 3-dimensional views of the landscape, panoramic photographs and videos. Uniquely, the reader can access all the data through their web browser, permitting them to perform their own studies and produce their own reading of the landscape of Stonehenge. *Stonehenge Landscapes* is a radical step forward in archaeological publishing, integrating computing and phenomenological study, permitting new insights into a well-known landscape and allowing the reader to participate in the study and interpretation of the results. The *Stonehenge Landscapes* CD includes a software program to display various data sets. The copyright owner of this program is Ronald Yorston. Archaeopress holds a licence to distribute the program as part of the electronic version of *Stonehenge Landscapes*.

Vaults of Silence Darragh Hogan, *Vaults of Silence* explores how geography is used to control history. From restricted canyons and forbidden airspace to capital cities designed with symbolic geometry, this book examines how difficult terrain and planned environments act as custodial systems for narratives, artifacts and memory. Rather than arguing conspiracy, it traces incentives why institutions manage access, reclassify landscapes and limit observation. Geography endures long after empires fall, but what we are allowed to see determines what we are allowed to know.

Exploring Sexuality and Spirituality, 2020-10-20. The wide spectrum of links and interrelations found amongst the diversity of human sexual expressions and spiritual practices around the world constitutes one of the most fruitful grounds of scholarly research today. *Exploring Sexuality and Spirituality* introduces an emerging academic field of studies focused on the multiplicity of problematizations intersecting spirituality and sexuality from eroticism and ecstasy, embodiments to inner spiritual cultivation, intimate relationships, sex education and gender empowerment. This collection of essays addresses subjects such as prehistoric art, Queer Theology, BDSM, Tantra, the Song of Songs, la petite mort, asceticism, feminist performative protests and sexually charged landscapes among others. Through varied methodologies and state-of-the-art interdisciplinary approaches, this volume becomes highly useful for readers engaged in the integration of scholarly and practical knowledge.
