Charging Ahead David Welch,2022-09-20 Mary Barra's quest to move GM to a manufacturer of electric cars has captured the attention of automobile aficionados green business advocates and leaders of all types who have to admire Mary's toughness in moving forward despite the overwhelming obstacles in her path A decade ago no one would have guessed that GM would be the company poised to lead America into the future At a time when business book readers seem endlessly fascinated by soaring tech giants like Amazon and Netflix and ill fated startups like WeWork and Theranos why is it important to put the spotlight back on 112 year old GM Because Charlie Wilson's quip from 1952 is still true What's good for GM is still good for America and vice versa America needs to transition to a new era of clean energy and environmentally sustainable transportation We also need to adapt to a world with far fewer assembly line jobs but far more skilled jobs for people who can design build and operate robots and other high tech machines GM's attempt to lead those transitions is as important as it is dramatic Equally compelling is the story of GM's CEO Mary Barra who against all odds took the reins at GM in 2014 Since that time she has attempted to reinvent a century old company and equip it for the biggest change in transportation since the internal combustion engine replaced the horse In the process she has been ripping out GM traditions by the roots and taking flak from all sides Her plan is to make GM the company famed for the gas burning Corvette hulking Cadillac Escalade and carbon spewing Silverado pickup purely electric and clean by 2035 She may not be as wealthy as Jeff Bezos as brash as Elon Musk or as powerful as Mark Zuckerberg but Mary Barra is just as important as any of them And as one of the most powerful female executives in the world she is overdue for an in depth look at her forward thinking vision her approach to leadership and her accomplishments against the odds

Charging Ahead Joe Sherman,1998-10-29 Charging Ahead is a classic tale of perseverance against daunting odds in the pursuit of a personal dream and an environmental revolution You'd have to be a fool to market a consumer electric car let alone challenge the big three auto makers with a little start up company But MIT graduate James Worden with his girlfriend and a handful of audacious engineers did both and he's well on his way to success In this marvelous narrative business writer Joe Sherman vividly describes how Worden and his team built the world's most advanced EV electric vehicle the Sunrise Combining insightful biography with the best of science and business writing Sherman captures not only Worden's own gripping story but also the technical challenge of designing an electric car in an age of anxiety over the environment He depicts Worden's fascination with EVs from childhood he built his award winning first electric car in high school tracing it through his monomaniacal career at MIT where he organized a student team that built EVs for races worldwide to the founding of Solectria a company committed to building a consumer electric car Sherman

shows how despite all the obstacles Solectria eventually lined up such strategic partners as the Pentagon on its way to producing the Sunrise a lightweight all composite high tech commuter car The Sunrise would triumph over rivals from the Big Three in the 7th American Tour de Sol and later travel from Boston to New York on a single battery charge Charging Ahead is an engaging story of James Worden s struggle to succeed with idealism energy and technological superiority against seemingly impossible odds
