African American Lives Henry Louis Gates Jr., Evelyn Brooks Higginbotham, 2004-04-29. *African American Lives* offers up to date authoritative biographies of some 600 noteworthy African Americans. These 1,000-3,000 word biographies selected from over five thousand entries in the forthcoming eight volume *African American National Biography* illuminate African American history through the immediacy of individual experience. Our past is revealed from personal perspectives that in turn inspire, move, entertain, and even infuriate the reader. Subjects include slaves and abolitionists, writers, politicians, and business people, musicians and dancers, artists and athletes, victims of injustice, and the lawyers, journalists, and civil rights leaders who gave them a voice. Their experiences and accomplishments combine to expose the complexity of race as an overriding issue in America's past and present. *African American Lives* features frequent cross references among related entries, over 300 illustrations, and a general index supplemented by indexes organized by chronology, occupation, or area of renown, and winners of particular honors such as the Spingarn Medal, Nobel Prize, and Pulitzer Prize.

Frontline Bodies Nicolas Martin-Breteau, 2024-04-16 A captivating exploration of Black American civil rights activism through the lens of sport In Frontline Bodies Nicolas Martin Breteau argues that sports are not and have never been purely about entertainment for Black Americans Instead beginning in the 1890s during Reconstruction Black Americans proactively used athletics as a tactic to fight racial oppression Since the body was the primary target of anti Black racial oppression African Americans turned sports into a key medium in their

struggles for dignity equality and justice Although Black photography and art also aimed at displaying the dignity of the Black body sports arguably had the greatest impact on American and international public opinion Martin Breteau considers the work of Edwin B Henderson a prominent Black physical educator civil rights activist and historian of Black sports Training Black children as athletes Henderson felt would work both to fortify racial pride and to dismantle racial prejudices two necessary requirements for a successful political liberation struggle In this way physical education became political education By the end of World War II the tactic of racial uplift through sports had reached its peak of popularity only to subsequently lose its appeal among younger activists many of whom believed that the strategy was ineffective in fighting institutional racism and served mainly as an emulation of middle class white norms By the end of the twentieth century Martin Breteau argues racial uplift through sports had lost its emancipating power The emphasis on the accumulation of wealth for professional athletes as well as sports ability to reinforce anti Black stereotypes had become a political problem for true collective liberation For a marginalized group of people that has been physically excluded from the democratic process however sports remain a political resource By studying the relationship between athletics and politics Frontline Bodies renews the history of minority bodies and their power of action Charles Richard Drew, Pioneer in Blood Research Richard Hardwick,1967 Drew Charles Richard **Charles Drew** Robyn Mahone-Lonesome,Nathan Irvin Huggins,1990 A biography of the surgeon who conducted research on the properties and preservation of blood plasma and was a leader in establishing blood banks *A Bio-bibliography of Charles Richard Drew, M.D. (1904-1950)* Emma Jones Hann,1969
