**Russian Exploration, from Siberia to Space** Brian Bonhomme,2014-01-10 In the history of geographical discovery and exploration a well known cast of European characters and events takes center stage While the importance of achievements by Columbus Cortes Magellan Cook Lewis and Clark and Neil Armstrong remains unassailable the participation of Russia in the European era of exploration conquest expansion and colonization deserves equal attention This study provides a narrative survey and critical analysis of a rich but overlooked tradition of geographical exploration by Russians and others in Russian service since 1580 Following Russian pioneers across Siberia Alaska Brazil Hawaii and the Pacific Central Asia Australasia the Arctic and Antarctic and into space this work establishes Russia in the history of world exploration and connects the Russian experience of exploration to Russian national identity past and present [Northern Sea Route Reconnaissance Report: Appendixes E, F, G, and H](#) ,1995 **From Northeast Passage to Northern Sea Route**

,2022-09-12 The notion of a waterway north of Eurasia conceived in the first half of the sixteenth century remained only a dream for centuries due to ice unmapped coastlines and a lack of geographical knowledge This volume is the first comprehensive scholarly account in English of the slow but steady exploration and commercial exploitation of the Siberian coastal waters and it proves that this was a truly international endeavour However in the end the Northern Sea Route as a through traverse route came to be used primarily by the Soviet Union for which it became a crucial vehicle for the geopolitical and economic integration of its vast territories As an international trade route the Northern Sea Route is only today about to win its way essentially as a result of global warming This being the case should we rejoice or despair

*Voyages on the Northern Sea Route* Tadeusz Pastusiak,2019-09-04 This book explains vessels ability to overcome ice on the Northern Sea Route as well as the criteria of safe speed and maneuvering of vessels on ice It provides a successful long term forecast of ice navigation and reveals the dangers of sailing on the Northern Sea Route It includes tips on how to plan and schedule voyages in the Russian Arctic The book develops a set of suggested routes for the period of opening and closing of the transit ice free zone through the NSR based on the last eleven navigation seasons It presents a method for determining the date for beginning a voyage of a vessel without ice strengthening through the NSR It also develops a model of initial long term and operational decision making support system for vessel voyage planning and scheduling The main audience for the book are officers at operational and management level of competency people planning voyages on the Northern Sea Route in the office of ship operator and in chartering department or consulting company and participants of Ice Navigator IMO Model Courses at basic and advanced level of competency **Climate Change and Adaptation Planning for Ports** Adolf K. Y.

Ng,Austin Becker,Stephen Cahoon,Shu-Ling Chen,Paul Earl,Zaili Yang,2015-08-14 As key links in transportation and supply

chains the effect of climate change on seaports has broad implications for the development prospects of the global economy. However, the picture is very uncertain because the impacts of climate change will be felt very differently around the world, both positively and negatively. This book addresses the need for quality theoretical analysis, highly innovative assessment methodologies, and insightful empirical global experiences so as to identify the best international practices, planning, and appropriate policies to effectively adapt to, develop resilience, and indeed benefit from the impacts posed by climate change on transportation and supply chains. This book comprises theories, methodologies, and case studies from five continents: Asia, Europe, Latin America, North America, and Oceania, addressing climate change and the adaptation planning of ports and transportation infrastructures. With reputable contributors from academic, policymaking, and professional sectors, it critically analyses the recent attempts by ports in establishing adaptation plans and strategies so to enhance ports and other transportation infrastructures' resilience to the climate change risks. This is the first book of its kind to focus on climate change adaptation for ports. It offers useful and comprehensive guidance to senior policymakers, industrial practitioners, and researchers who are eager to understand the dynamics between climate change adaptation planning of ports and transportation infrastructures.

Frolov, Stein Sandven, Lasse H. Pettersson, Leonid P. Bobylev, Kjell Kloster, Vladimir G. Smirnov, Yevgeny U. Mironov, Nikolay G. Babich, 2006-11-30 **Remote Sensing of Sea Ice in the Northern Sea Route: Studies and Applications** initially provides a history of the Northern Sea Route as an important strategic transport route for supporting the northern regions of Russia and cargo transportation between Europe and the Northern Pacific Basin. The authors then describe sea ice conditions in the Eurasian Arctic Seas and using microwave satellite data provide a detailed analysis of difficult sea ice conditions. Remote sensing techniques and the basic principles of SAR image formation are described as well as the major satellite radar systems used for ice studies in the Arctic. The authors take a good look at the use of sensing equipment in experiments including the ICE WATCH project used for monitoring the Northern Sea Route. The possibilities of using SAR remote sensing for ice navigation in the Northern Sea Route is also detailed, analysing techniques of automatic image processing and interpretation. A study is provided of regional drifting ice, fast ice, and river ice in the coastal areas of the Arctic Seas. The book concludes with a review of the practical experience using SAR images for supporting navigation and offshore industrial activity based on a series of experiments conducted with the Murmansk Shipping Company on board nuclear icebreakers.
