Heterotopia and the City Michiel Dehaene, Lieven De Cauter, 2008-05-15 Heterotopia literally meaning other place is a rich concept in urban design that describes a space that is on the margins of ordered or civil society and one that possesses multiple fragmented or even incompatible meanings The term has had an impact on architectural and urban theory since it was coined by Foucault in the late 1960s but it has remained a source of confusion and debate since Heterotopia and the City seeks to clarify this concept and investigates the heterotopias which exist throughout our contemporary world in museums theme parks malls holiday resorts gated communities wellness hotels and festival markets With theoretical contributions on the concept of heterotopia including a new translation of Foucault s

influential 1967 text *Of Other Space* and essays by well known scholars the book comprises a series of critical case studies from Beaubourg to Bilbao which probe a range of post urban transformations and which redirect the debate on the privatization of public space Wastelands and terrains vagues are studied in detail in a section on urban activism and transgression and the reader gets a glimpse of the extremes of our dualized postcivil condition through case studies on Jakarta Dubai and Kinshasa Heterotopia and the City provides a collective effort to reposition heterotopia as a crucial concept for contemporary urban theory The book will be of interest to all those wishing to understand the city in the emerging postcivil society and post historical era Planners architects cultural theorists urbanists and academics will find this a valuable contribution to current critical argument

The Price Club John Miller, 2000 The collection Positions is dedicated to the publication of artist's writings John Miller perfectly embodies the aim of this series to interrogate artistic and curatorial practices as well as theory through the singular position of artists involved in both their own and other artists' works This production reception question might even be a real dialectic in Miller's case From his early writings in fact he argues that the artist has no other choice but to confront sociopolitical questions the ideological apparatus involved in the production of cultural artifacts and therefore the theoretical corpus be it Walter Benjamin the Frankfurt School or feminist and poststructuralist writings that enables one to reconceive these dimensions of artmaking From polemical texts to extensive theoretical essays passing through Ed Ruscha Bruce Nauman or John Baldessari these writings have proved to be among the most challenging ones
